

Board on Behavioral, Cognitive, and Social Sciences

DIVISION OF BEHAVIORAL AND SOCIAL SCIENCES AND EDUCATION

The Board on Behavioral, Cognitive, and Sensory Sciences (BBCSS) was established in 1997 as the locus of work for the behavioral sciences at the National Academies of Science, Engineering, and Medicine. Its mission is to support cross-disciplinary inquiry into complex scientific and policy questions, draw attention to the behavioral sciences for national policy initiatives, and provide a vision of where the behavioral sciences are headed.

As an interdisciplinary board, BBCSS oversees studies that range from examining how learning changes the physical structure of the brain to considering how the behavioral and social sciences can enhance the work of intelligence analysts and strengthen national security.

Members represent a range of fields, including psychology, linguistics, otolaryngology, cognitive science, neuroscience, and anthropology. BBCSS provides a forum for objective, independent, and rigorous deliberation among researchers, the public, the media, Congress, professional associations, and federal agencies.

AREAS OF PROJECT DEVELOPMENT

- National Security
- Aging, Alzheimer's Disease
- Motivation, Emotion, Cognition
- Brain and Behavior
- Program Evaluation
- Behavioral Health

CURRENT SPONSORS

Core Sponsors

- National Science Foundation (Division of Social, Behavioral & Economic Sciences)
