COMMITTEE ON POPULATION

**Workshop on Future Directions for the Demography of Aging**

**National Academies of Sciences Building  
Lecture Room  
2101 Constitution Avenue, NW  
Washington, DC 20418  
August 17-18, 2017**

The goal of this workshop is for participants to draw on recent developments in social demography, social epidemiology, sociology, and economics and related fields to identify and explore future directions that have significant promise and are expected to have major influences on research on aging. The product of the workshop will be a volume of selected papers that will be published by National Academies Press. These papers are intended to stimulate new research approaches and new collaborations with neighboring disciplines, and to set a research agenda for years to come.
