Estimates of Allowance Costs of Lieberman-Warner bill from various analyses

Francisco C. de la Chesnaye
Screened Marginal Costs of Lieberman-Warner and Importance of Modeling Assumptions

Control for specified constraints on technology, assumptions on offsets, different reference cases, and bill interpretation.

Costs – both $t/CO_2$ and GDP impacts – will be double unless deploy technologies, have access to offsets, etc.

Range in 2030 is $46 to $89

Range in 2050 is $121 to $195
