

## **PROJECT UPDATE: International Research Collaborations**

*GUIRR Volunteers: Jim Casey (University of Texas at San Antonio), Bob Killoren (The Ohio State University), Maria Koszalka (Northrop Grumman), Mark Maurice (AFOSR), Barbara Mittleman (NIH), Celia Merzbacher (Semiconductor Research Corporation), Norka Ruiz Bravo (NIH), Wally Schaffer (NIH), Patrick Schlesinger (University of California-Berkeley), Dan Mote (University of Maryland), Robin Staffin (DoD)*

*Collaborators: Susan Butts (Dow Chemical), John Carfora (Loyola Marymount University), Brian Fitzgerald (Queensland University of Technology-Australia), Wayne Johnson (formerly Hewlett-Packard), Sandra Titus (DHHS-ORI), Larry Weber (NSF)*

**PROJECT BACKGROUND:** Member interest in the issue of global research agreements became accentuated after the June 2008 GUIRR meeting (“New Partnerships on a Global Platform”) and its focus on the growing complexity of international relationships. The notion of ‘government’ no longer necessarily means a federal agency; instead, it can be the World Bank or the United Nations, government associations, the State Department, or a state government. The same is true for universities – the partner engaging in collaborative activity may be a university department, a faculty member, an educational association, or some other entity. So too is the case with industry, which may now be globalized or local, large and established or a small start-up venture. A teleconference on July 15, 2008 confirmed interest in further examining what presently constitutes a sound research agreement in any given sector and also identifying the current barriers and work-arounds to their formation. A newly formed GUIRR working group has concluded that, while there is clearly no “one-size-fits-all” master agreement, identification of the elements of international research agreements would provide valuable guidance to the research community *writ large*.

**SUMMARY STATUS:** The working group convened its second day-long face-to-face meeting at the National Academies Keck Center on March 26, 2009, with 15 team members in attendance. The group solidified a statement of purpose for the so-called “I-Group” as well as a statement of purpose for a workshop planned for March 2010.

The proposed workshop will include two plenary sessions with scheduled session leaders, six topical groupings/tracks (issues that impede collaboration and formation of partnerships), and a final summary session. Issues/themes to be addressed in the workshop include the following: (1) Cultural Differences and Nuances (Plenary Panel, Day 1); (2) Legal Issues and Agreements (Plenary Panel, Day 2); (3) Differences in Ethical Standards; (4) Research Integrity and the Responsible Conduct of Research; (5) Intellectual Property; (6) Risk Management; (7) Business, Financial, and Currency Topics; and (8) Export Controls.

I-Group will assemble a widely diverse, inclusive, and international group of subject matter experts who are willing to contribute to the critical thinking and discussions necessary to create a body of knowledge essential to the completion of a primer and reference materials. The following deliverables will be produced: (1) a summary report of the workshop; (2) website for posting questions and supporting a “tool box” with international participation; and (3) other tools that will be useful to practitioners. In planning the workshop, the group will begin with the end in mind; that is, it will seek to assemble thematic workshop champions and teams that can later draft chapters for the primer.

I-Group members are currently seeking funds to support the proposed workshop. In addition, the group has created an online, dedicated web portal for posting relevant resources. A considerable number of materials have been posted to date.
