Ball, Wang and Nehring (2010) reported that “... statistical analysis of the [USDA] data does not provide evidence of a longrun productivity slowdown.”

Alston, Anderson, James and Pardey (2010a, pp. 120–121) concluded “There can be little doubt that the InSTePP MFP data exhibit evidence of a slowdown in multifactor productivity growth in the period 1990–2002 compared with the previous [1949–1990] period.”
