

INTERNATIONAL GEOSCIENCE

Think globally and act globally!

IUGG is comprised of eight semi-autonomous associations:

- International Association of Hydrological Sciences (IAHS)
<http://iahs.info>
- International Association of Cryospheric Sciences (IACS)
www.cryosphericciences.org
- International Association of Volcanology and Chemistry of the Earth's Interior (IAVCEI)
www.iavcei.org
- International Association of Meteorology and Atmospheric Sciences (IAMAS)
www.iamas.org
- International Association for the Physical Sciences of the Ocean (IAPSO)
<http://iapso.iugg.org>
- International Association of Geodesy (IAG)
www.iag-aig.org
- International Association of Seismology and Physics of the Earth's Interior (IASPEI)
www.iaspei.org
- International Association of Geomagnetism and Aeronomy (IAGA)
www.iugg.org/IAGA/

- Are you doing research on volcanoes, hydrology, snow and ice, chemistry of the Earth's interior, seismicity, geodesy, climate change, meteorology, and/or other Earth Sciences?
- Are you interested in:
 - travel grants to attend international meetings?
 - research grants from foreign scientific organizations?
 - participating in international scientific activities?
 - collaborating with people in developing countries?
- Get involved in international scientific unions and associations!
- **Attend the AGU Town Hall on December 7th, 12:30-1:30pm at the Moscone Center, Moscone West, Room 2009**
- Among the unions focused on the Earth sciences are IUGG (Geodesy and Geophysics), IUGS (Geological Sciences), IUSS (Soil Science), and INQUA (Quaternary Research). The U.S. is represented in these unions through national committees organized by the National Academy of Sciences. <http://www.nationalacademies.org/usnc-iugg/>
- Unions and many associations have commissions and working groups (see box).
- Many meetings you know about are sponsored by these organizations.

Give a talk at one of these assemblies, email a Commission officer to get involved, ask a U.S. National Committee member for information (see QR below), **and come to our Town Hall on December 7th at AGU!**

Joint IAHS, IAPSO,
IASPEI, 22-26 July,
Göteborg, Sweden

IAG, 1-6 September,
Potsdam, Germany

IAVCEI, 20-24 July,
Kagoshima, Japan

IAGA, 26-31 August,
Mérida, Mexico

Joint IACS,
IAMAS, 8-12 July,
Davos, Switzerland

2013 SCIENTIFIC ASSEMBLIES

This flyer was prepared by the U.S. National Committee for Geodesy and Geophysics.
