## FITNESS ZONE SITING ANALYSIS

For many residents, finding a place to exercise can be challenging. The high level of fitness zones provides some evidence of fitness opportunities in local parks. This study is the City of Chattanooga's "second" round of analysis by identifying a set of other locations. Parks with highest opportunity for fitness zones are shown in dark green. Areas highlighted in orange to light green of moderate high need for fitness zones across the entire city (outside of existing parks) using the above criteria of land features.

### Legend

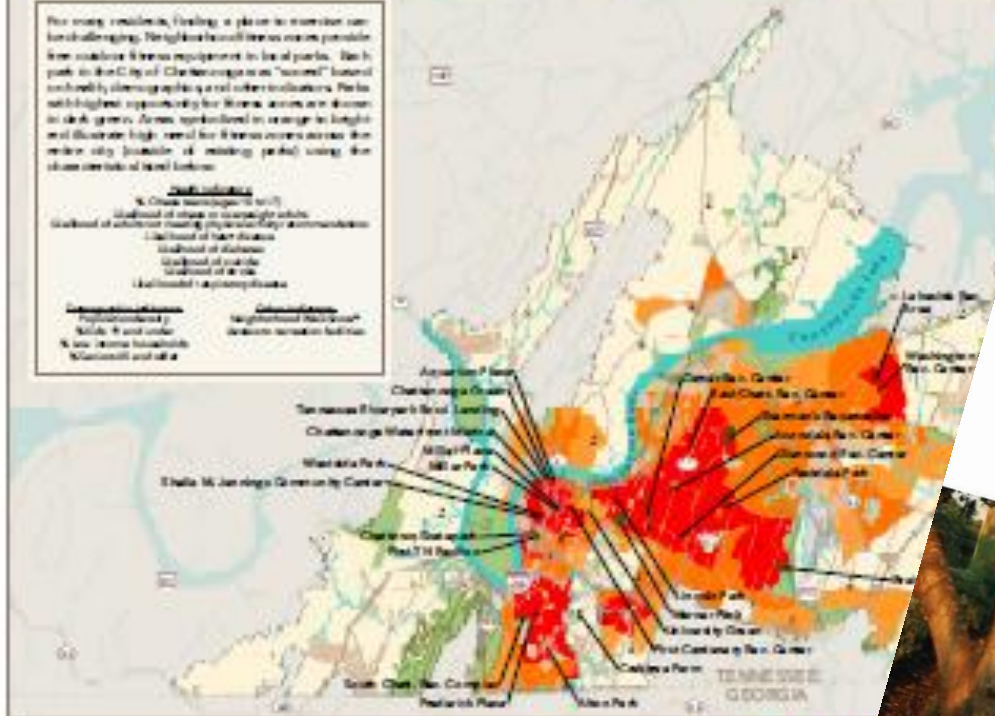

- High fitness zones (10-15%)
- Medium fitness zones (15-25%)
- Low fitness zones (25-35%)
- Lowest fitness zones (35-45%)
- Lowest fitness zones (45-55%)
- Lowest fitness zones (55-65%)
- Lowest fitness zones (65-75%)
- Lowest fitness zones (75-85%)
- Lowest fitness zones (85-95%)
- Lowest fitness zones (95-100%)

### Geographic Features

- Population density
- Water
- Highway
- Interstate
- Waterway

# Climate-Smart Cities: Healthy Connected Chattanooga

## Identifying Priorities for Multi-Benefit Green Infrastructure Investments

The Climate-Smart Cities Program partners with cities to deliver climate mitigation and adaptation outcomes, organized around four core objectives for green infrastructure investment: Cool, Connect, Attract, and Protect, and one cross-cutting objective: Equitable Access and Health.

The City of Chattanooga has been a national leader in leveraging a sustainable, prosperous, and resilient city through creative use of green space and other public amenities. A greener and more livable Chattanooga has brought economic development, new residents and businesses, recreation opportunities for a healthy and active population, a healthier living environment, and myriad other benefits.
