

# Making Value For America

## GUIRR Webinar

Lawrence D. Burns, PhD

January 19, 2016

# National Academy of Engineering

# Making Things: General Motors

- 1992-2007
  - GM transformed how it made cars & trucks
    - Design for Manufacturability
    - Lean Manufacturing
    - Global Sourcing
    - Supply Chain Management
    - Quality/Reliability/Durability Processes
    - Product Portfolio Planning
    - Product Development Process
    - Math-Based Design and Engineering
    - Throughput Improvement
    - Compelling Design
  - Market Cap
    - \$66 B 2000
- 2008
  - GM could not get ahead of its legacy costs
- 2009
  - GM bankruptcy

# National Academy of Engineering

## MAKING VALUE FOR AMERICA

Embracing the Future  
of Manufacturing,  
Technology, and Work

NATIONAL ACADEMY OF ENGINEERING  
OF THE NATIONAL ACADEMIES

# Making Value: Apple

- 1997
  - Apple lost \$1.6 B
  - 6 months away from bankruptcy
  - Steve Jobs named interim CEO
  - \$2 B market cap
- 1998-2000
  - iMac sales success
  - Return to profitability
  - Steve Jobs named permanent CEO
  - \$16 B market cap
- 2001-2015
  - Apple Retail Stores
  - iPod
  - iTunes
  - iTunes Store
  - MacBook Pro
  - iPhone
  - Apple TV
  - Apps
  - iPad
  - Apple WATCH
  - >\$700 B market cap

# Making Value

Builds Strong Brand Equity

Leads To Superior Financial Returns

# Making Value

The process of using **ingenuity** to create value for people and society

# Value Network

The interdependent activities performed to make value

- Spans many locations and economic sectors
- Involves work by multiple companies and workers
- Is driven by the desires of the end customer

# Making Value: Keys to Success

## Integrated System

Maximize value over the entire global value network

## Design Innovation

Focus on the total customer experience

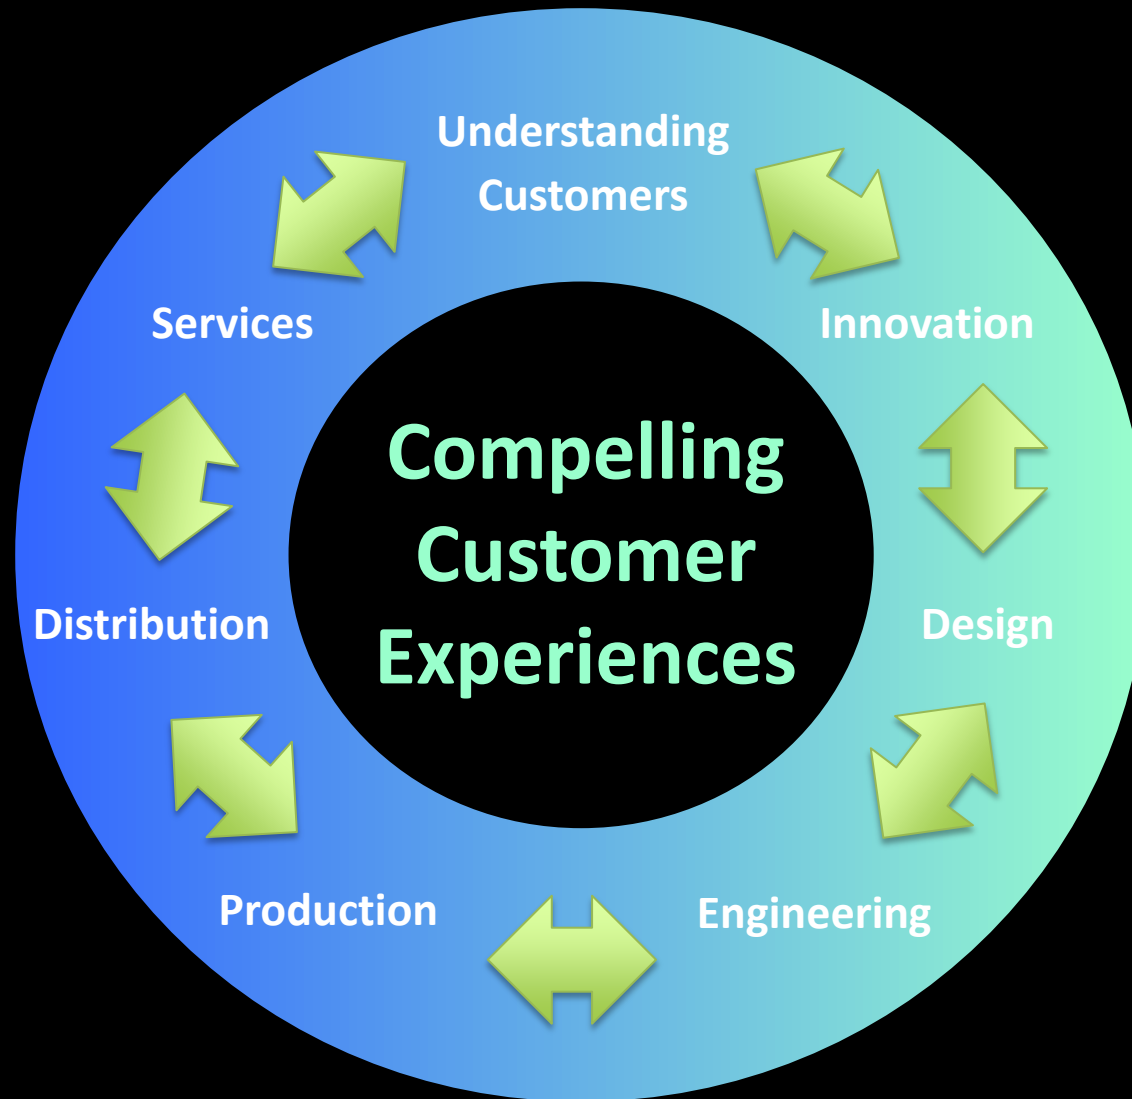

## Technology Innovation

Create compelling customer experiences

## Operational Excellence

Ensure consistently positive customer experiences

# Making Value: Integrated System

# Design Innovation Focused on the Total Customer Experience

## The Ultimate Sustainable Advantage

- Compelling and Low Cost Products and Services
- Premium Prices
- Superior Returns

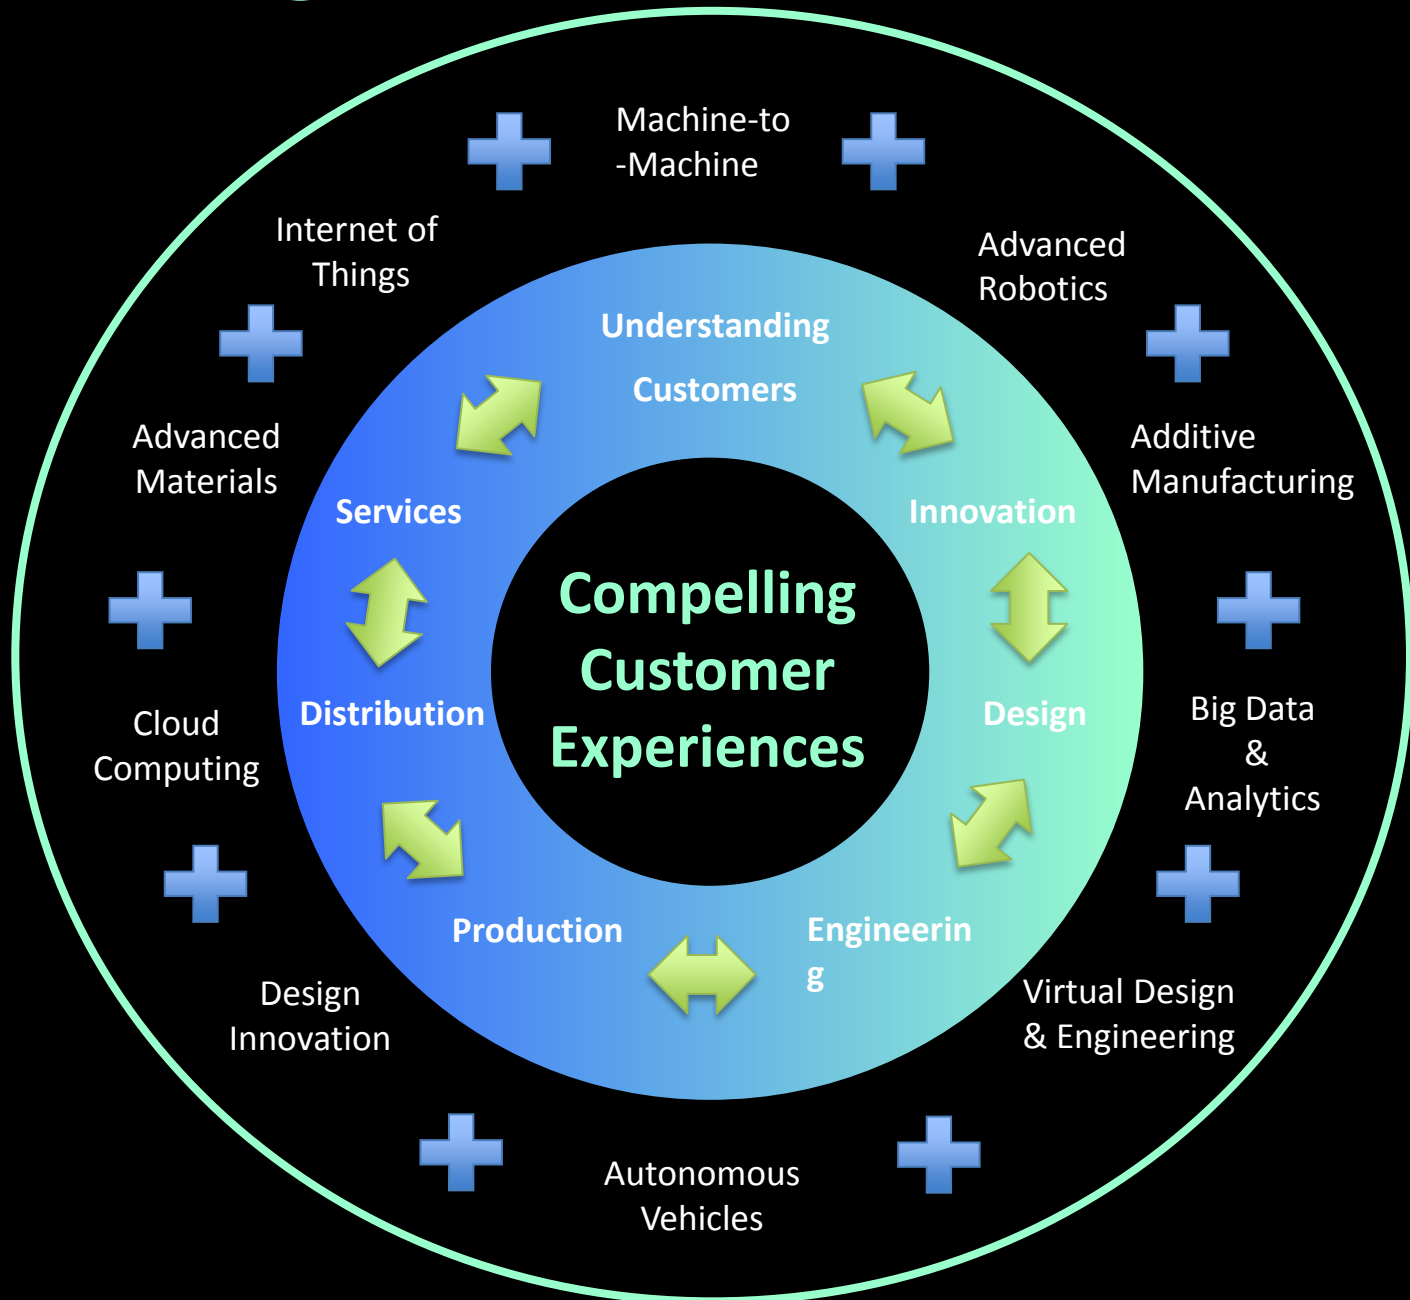

# Technology Innovation

- + Information
- + Communications
- + Robotics
- + Processes
- + Materials
- + Work Systems
- + Analytics
- + Energy

# Operational Excellence

- Fundamental to making value
  - “Brands are all about trust that is built in drops and lost in buckets”
    - Kevin Plank, Under Armour CEO
- Numerous proven best practices
  - Design for Manufacturability
  - Lean Manufacturing
  - Global Sourcing
  - Supply Chain Management
  - Quality/Reliability/Durability Processes
  - Customer Relationship Management
  - ....
- New opportunities
  - “Big data” and advanced analytics
  - Advanced robotics
  - Virtual design and engineering
  - Low-Cost Sensors and Actuators
  - Remote Diagnostics & Prognostics
  - ....

# Making Value: Transformation

# Examples

Jeans

Running Shoes

Mobility

# Automotive “DNA”

## Historical “DNA”

- Mechanical Drive
- Combustion Engines
- Oil-based Fuels
- Mechanical & Hydraulic
- Stand-alone
- Personally Owned
- Human Operated
- General Purpose

## New “DNA”

- Electrical Drive
- Electric Motors
- Diverse Energy Sources
- Electronic & Digital
- Connected and Coordinated
- Shared
- Driverless
- Tailored

# Transformational Opportunity

Connected  
+  
Coordinated  
+  
Shared  
+  
Driverless  
+  
Tailored

---

***Better Mobility Experiences  
at Radically Lower Societal and Consumer Cost***

# Better Mobility Experiences

- Safer
- More Convenient
- More Productive
- More Personalized
- More Affordable

***Improving All Attributes Simultaneously!***

# Lower Societal Cost

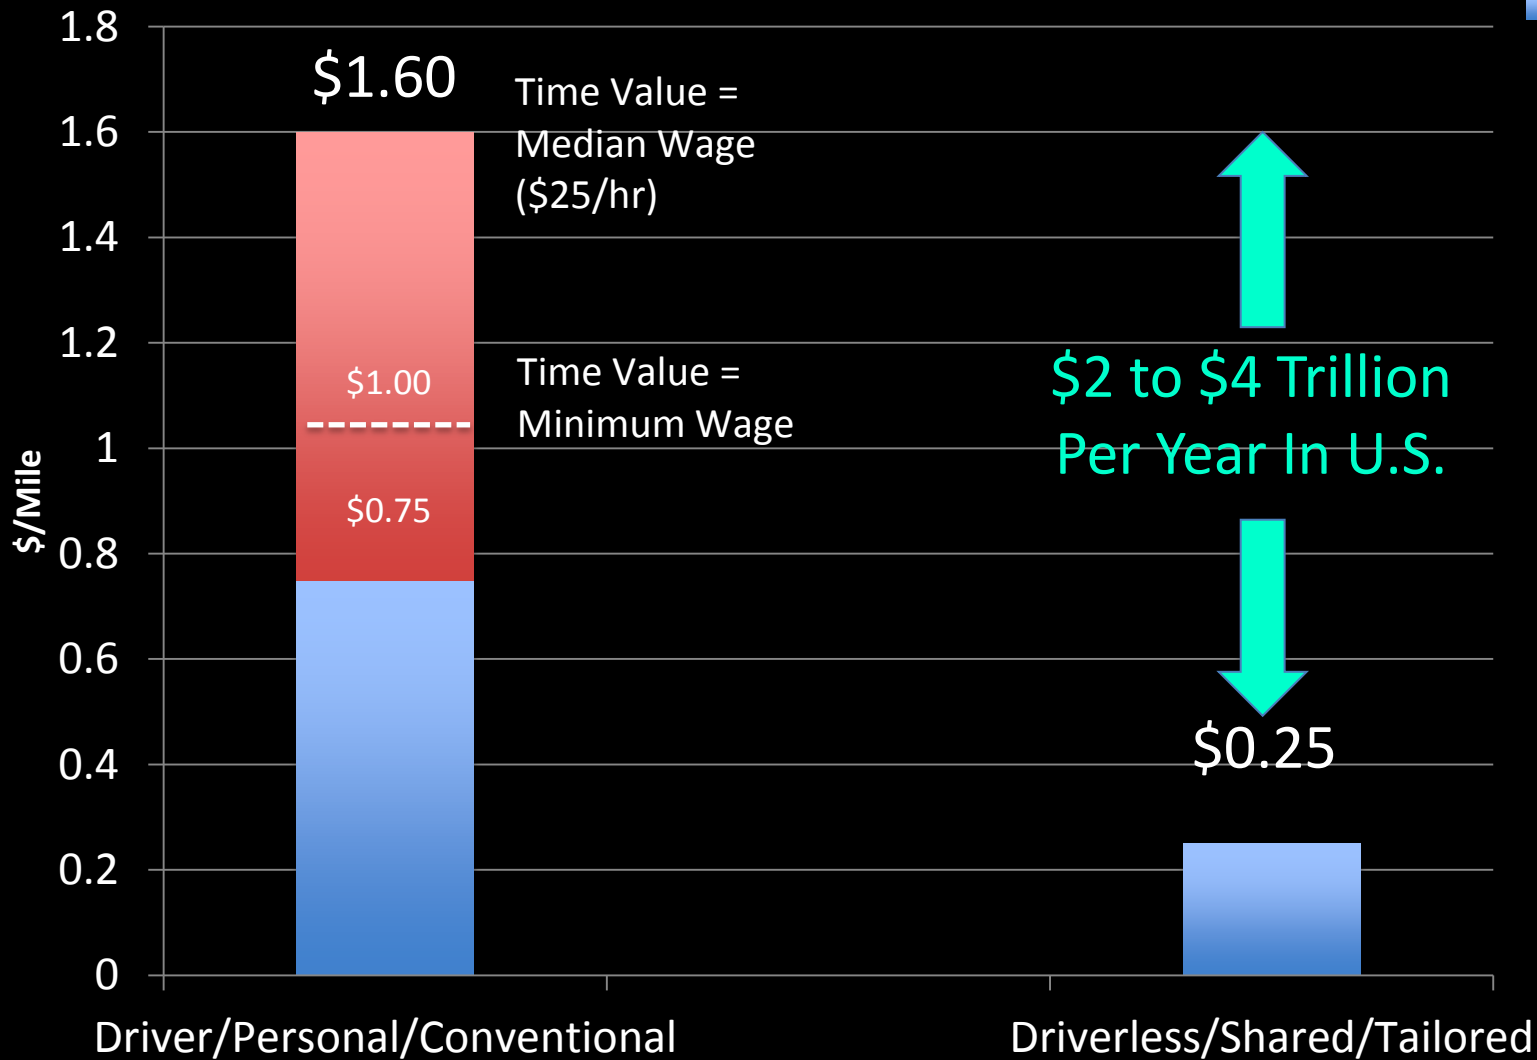

- Fewer Fatalities
- Fewer Injuries
- Less Energy Use
- Less CO<sub>2</sub> Emissions
- Less Congestion
- Better Land Use
- More Equitable Access

***Reducing All Side Effects Simultaneously!***

# Lower Consumer Cost

## Cost/Mile

- Time Cost
- Money Cost

# Government-University-Industry Research Opportunities

- Codify the Fundamentals of Making Value in the 21<sup>st</sup> Century
- Define 21<sup>st</sup> Century Work Systems and Jobs
- Define 21<sup>st</sup> Century Education
  - In All Fields (Especially Business, Design and Engineering)
  - At All Levels
- Define 21<sup>st</sup> Century Economics
- Define 21<sup>st</sup> Century Policies for Making Value
  - Education
  - Immigration
  - Investment
  - Equality of Opportunity
- Define 21<sup>st</sup> Century Infrastructure Required for Making Value

# Government-University-Industry Research Opportunities

- Deeply understand the future of work and the knowledge and know-how required to prosper in this future
  - Define standards for “employment fitness” for people of all ages
  - Comprehend how technology will continue to shape the future
  - Define and quantify the future of “middle class” jobs
  - Assess what factories might look like in 20 years and the types of jobs/skills required for these factories
- Understand how sustainability, economic growth, productivity, technology and jobs interrelate
- Understand why small business start-ups are declining

***THE FUTURE OF  
INNOVATION, TECHNOLOGY AND WORK  
COULD BE THE DEFINING  
OPPORTUNITY & CHALLENGE OF OUR TIME***

Back-ups

# Technology Innovation

- Information
  - Internet of “Things”
  - Cloud Computing
  - More “Moore’s Law”
- Communications
  - Mobility Internet
  - Machine-to-Machine (M2M)
- Robotics
  - Autonomous Vehicles
  - Enhanced Sensors, Dexterity and Intelligence
  - Automate Tasks and Augment Humans

# Technology Innovation

- Processes
  - Additive Manufacturing (3D-Printing)
  - Advanced Machining, Forming and Joining
  - Sustainable Manufacturing
  - Low-Cost Sensors and Actuators
  - Remote Diagnostics & Prognostics
- Materials
  - Nano-technology
  - Designed for Superior Strength, Mass, Conductivity, Functionality and Sustainability

# Technology Innovation

- Work Systems
  - Advanced Systems Design and Engineering
  - Intelligent Software for Knowledge Work
  - Virtual/Math-Based Design, Engineering and Manufacturing
  - Design Innovation Focused on Customer Experiences
- Analytics
  - “Big Data”
  - Speed to Insight
- Energy
  - Enhanced Oil and Gas Exploration and Recovery
  - Renewables
  - Storage

# New Technology “Improves” Existing Technology

- Aluminum has driven improvements in steel auto bodies
- Electric vehicles are driving improvements in internal combustion engines
- Plentiful natural gas will drive improvements in coal and renewables
