Find your Niche!

Umbrella IR: Accountable Sustainable Management of Water Resources Increased

IR 1: National Sustainable **Water Supply System Improved**

- 1. Supply of Water Increased in Water **Supply System**
- 2. Management of **Water Entities Improved**

IR2: Water Conserved

Comp 1: H2O Cons **Technol & Behavior Change Adopted**

Comp 2: Sustainable Aquifer Recharge

Comp 3: Institutions Strengthened to Promote Water Saving Technologies

IR3 Water Sector Governance Improved

- 1. Financial **Sustainability of Water Sector Improved**
- 2. Transparency and **Accountability Improved**
- 3. Bilateral and Regional Agreements Supported and **Promoted**

IR4: Water Supply and Resources Protected

- 1. Enforcement and **Compliance Improved**
- 2. Management of **Wastewater Improved**

Water Conservation Activity

Don't forget to integrate

Crosscutting Themes and Synergies between DOs/IRs in Jordan

- Gender
- Youth
- Conflict
- Population

- Jordan is a lily pad where everybody wants to work because it is stable.
- Must get approval for meeting from the Ambassador – plan ahead.
- Have a high tolerance for ambiguity: The meeting should have a minimum impact on USAID/STATE but to do a good job you have to invest a lot of time and energy.

- MERC (pre and full proposals)
- PEER (pre- and full proposals) core and mission funded
- SWFF & PAEGC (two phase review)
- MENA-NWC
- About 20 proposals this year some only at the first phase some at both. Too many to follow – many with no further feedback – a disconnect.
- There is a huge size difference in resources from the Mission vs DC- based mechanisms

Kill 2 birds with 1 stone

Better align with Mission / Region?

- 1. USAID does not communicate well across Missions because of its bilateral nature
- Arabs are independent and individualists you have an opportunity to learn how to work as teams through PEER/MERC.
- 3. Why not have PEER cut across Missions with down-stream topics like constructed wetlands; olive oil waste recycling; deficit irrigation of olives; hydroponics; commercialization?

Choose your approach in the ME

- 1. Start with Mission Directors who like science.
- 2. Involve MERP because they are regional.
- 3. Align with STATE when possible.
- 4. Develop themes that match the DOs/IRs in the target missions.
- 5. Create a matrix and write a concept note to sell the regional project(s). *Use a flash talk video?*
- 6. Explain how it will be financed and managed Mission-by-Mission or through DC or MERP?

Go PEER! Go MERC!
