International workshop on Water governance, climate change and food security in minority community, Vietnam

The Research Center for Rural Development (RCRD) of An Giang University is organizing the International Workshop on **Water governance, climate change and food security in minority community, Vietnam**, which will be held on September 21-22th, 2018, at An Giang University, Vietnam.

The workshop intends to: (1) to draw research findings from underrepresented minority communities in Vietnam to improve water resource governance, climate change adaptation and food security; (2) to provide opportunity for local, international multidisciplinary research team to share water governance knowledge, adaptation to climate change and food security of the *Khmer* communities in Southern Vietnam and other minority communities in the central highland and in the Northwestern Vietnam; (3) to organize a field visit for stakeholders and speakers to the research sites in Tri Ton and Tinh Bien districts of An Giang province; and (4) to learning from the knowledge within the minority communities and provide technical materials to the community at the end of this workshop. The contributed workshop papers will be used to prepare for the policy papers and the synthesis report which aims to be published in international journal articles.
