

CESAS Update to SSB

Mark Abbott

Oregon State University

Co-Chair, Committee on Earth Science
and Applications from Space

Disclaimer: These slides represent a personal assessment of the issues discussed by the CESAS. This document should not be cited or quoted because the views expressed do not necessarily reflect those of CESAS, SSB, or the NRC.

Recent Activities

- Continuity study
 - Well underway, but this continues to be a challenging study
 - Continue measurements or start something new?
 - Answer cannot be “yes”
 - Developing a quantitative framework to guide these assessments
 - Report is due in early 2015

Recent Activities, cont'd

- Briefings on “new space” developments
 - New approaches to sensors, platforms, and launchers
 - New players
 - Rapid changes in the underlying technologies
- National Plan for Civil Earth Observations
 - Avoids the research/operations dilemma and instead examined sustained vs. experimental
 - Structured around “societal benefit areas”
 - But hard to set priorities and to quantify impact of measurements
