## The economic impact of information technology

ICT industry value-add to GDP grew by nearly 10% over past 5 years;  
**5.7% of 2013 US GDP** [BEA]

Projected job growth 2012-20 of **28-32%** in s/w dev+related [NRC]

Internet directly supports **21% of GDP growth** in mature economies [McKinsey Global]

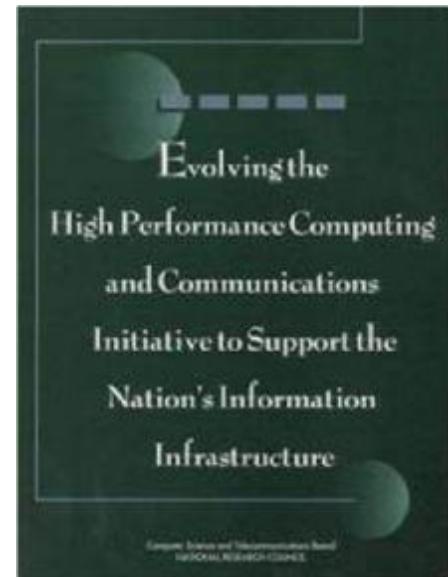

**Federal funding** in FY2010 for NIT R&D was **<0.03% US GDP** [NRC]

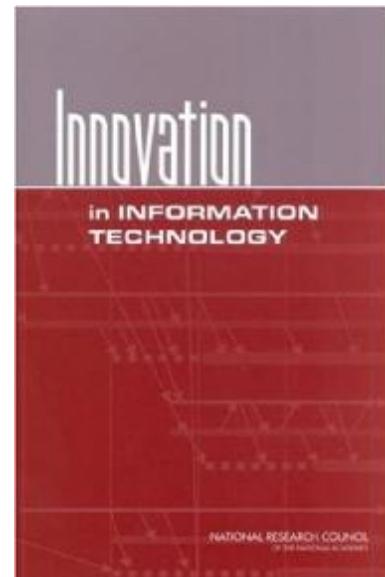

Brynjolfsson, Hitt, and Yang 2002

How did we get here?

A recurring subject  
of study by NRC

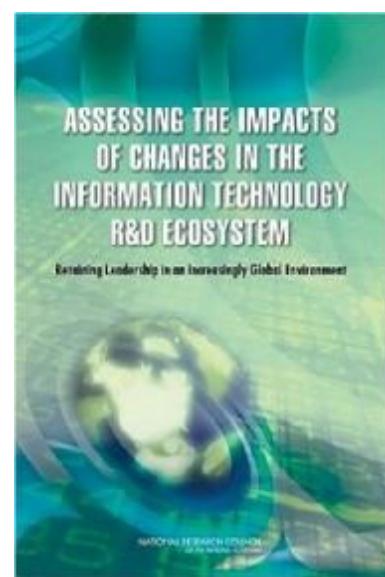

1995

2003

2011

2009

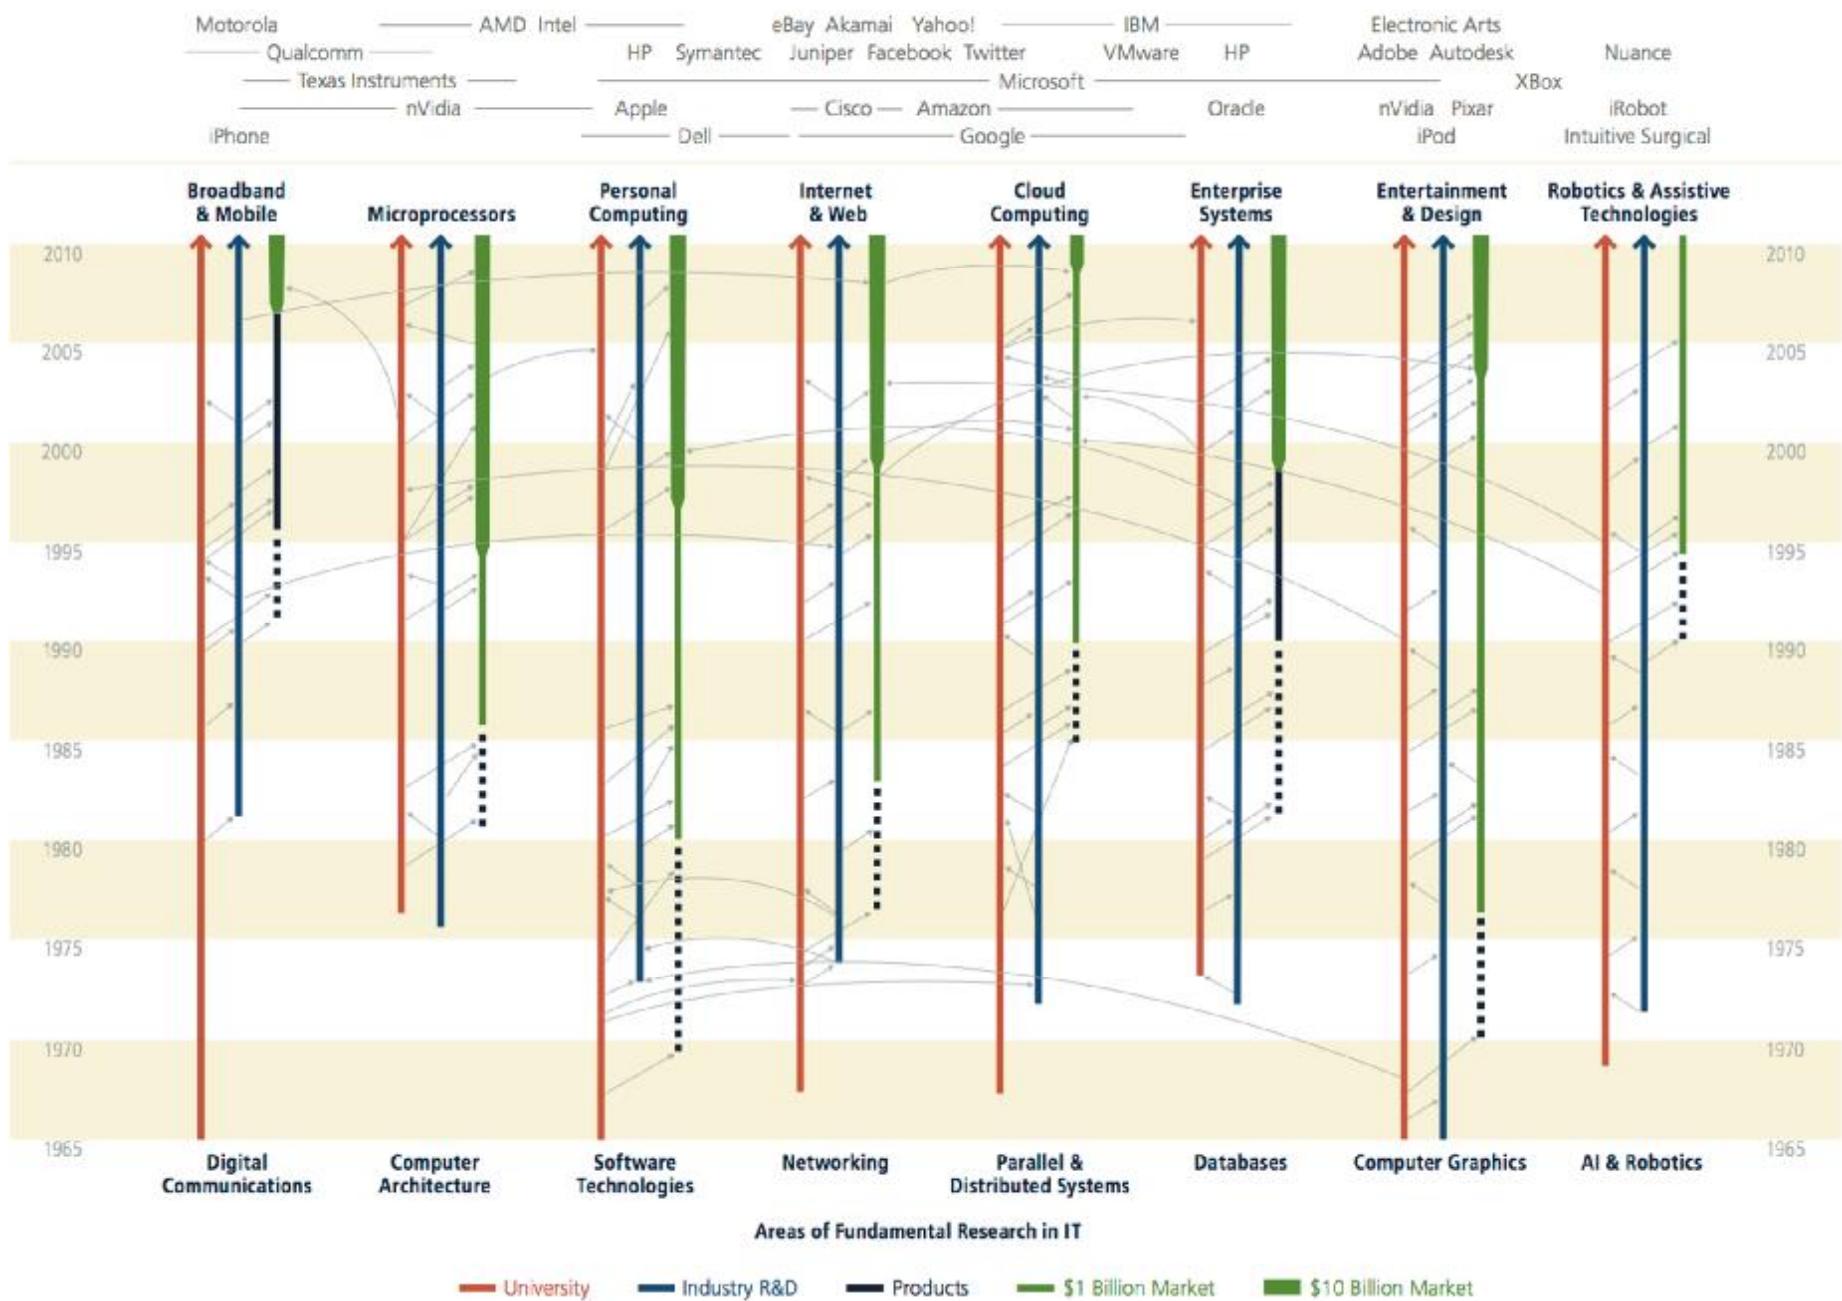

## NRC's findings

An **innovation ecosystem**  
involving gov't, academic, industry

The ability to **sustain 10-15 yr time** from  
research breakthrough to economic impact

Uniqueness in **harnessing technological  
surprise** and unanticipated impacts

## IT Sectors With Large Economic Impact

## IT Sectors With Large Economic Impact

Major IT market sectors, with some sample companies

Motorola, Qualcomm, Texas Instruments, IBM, HP, Symantec, Juniper, Facebook, Twitter, Microsoft, Oracle, nVidia, Pixar, Autodesk, XBox, Nuance, Robot, Biological

Broadband & Mobile, Microprocessors, Personal Computing, Internet & Web, Cloud Computing, Enterprise Systems, Entertainment & Design, Robotics & Assistive Technologies

*"Tiretracks," depicting the interplay between academic research, industry R&D, and product/business development*

Digital Communications, Architecture, Wireless Technologies, Networking, Mobile Computing, Distributed Systems, Computer Vision, AI & Robotics

Areas of Fundamental Research in IT

University

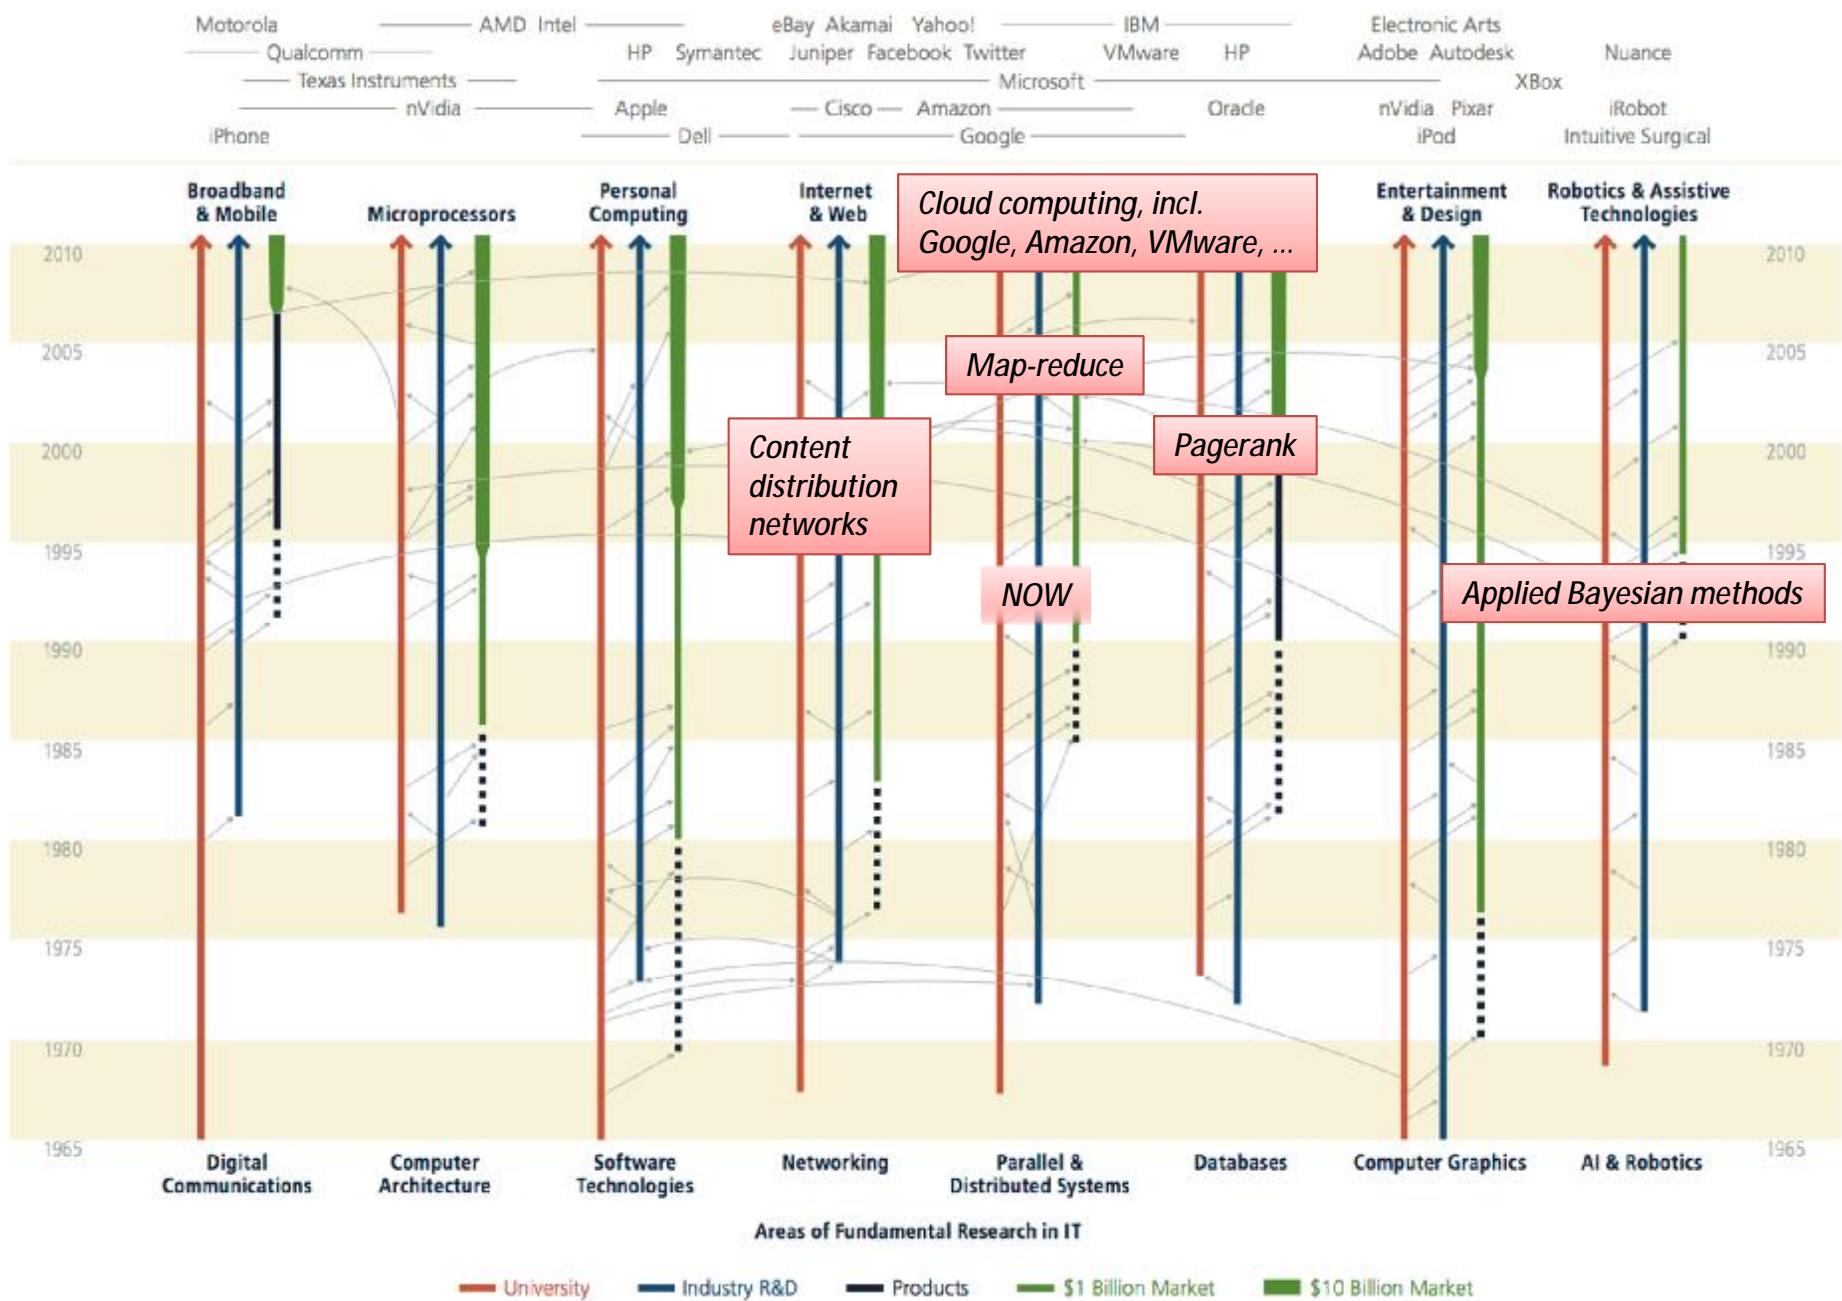

Industry R&D

Products

\$1 Billion Market

\$10 Billion Market

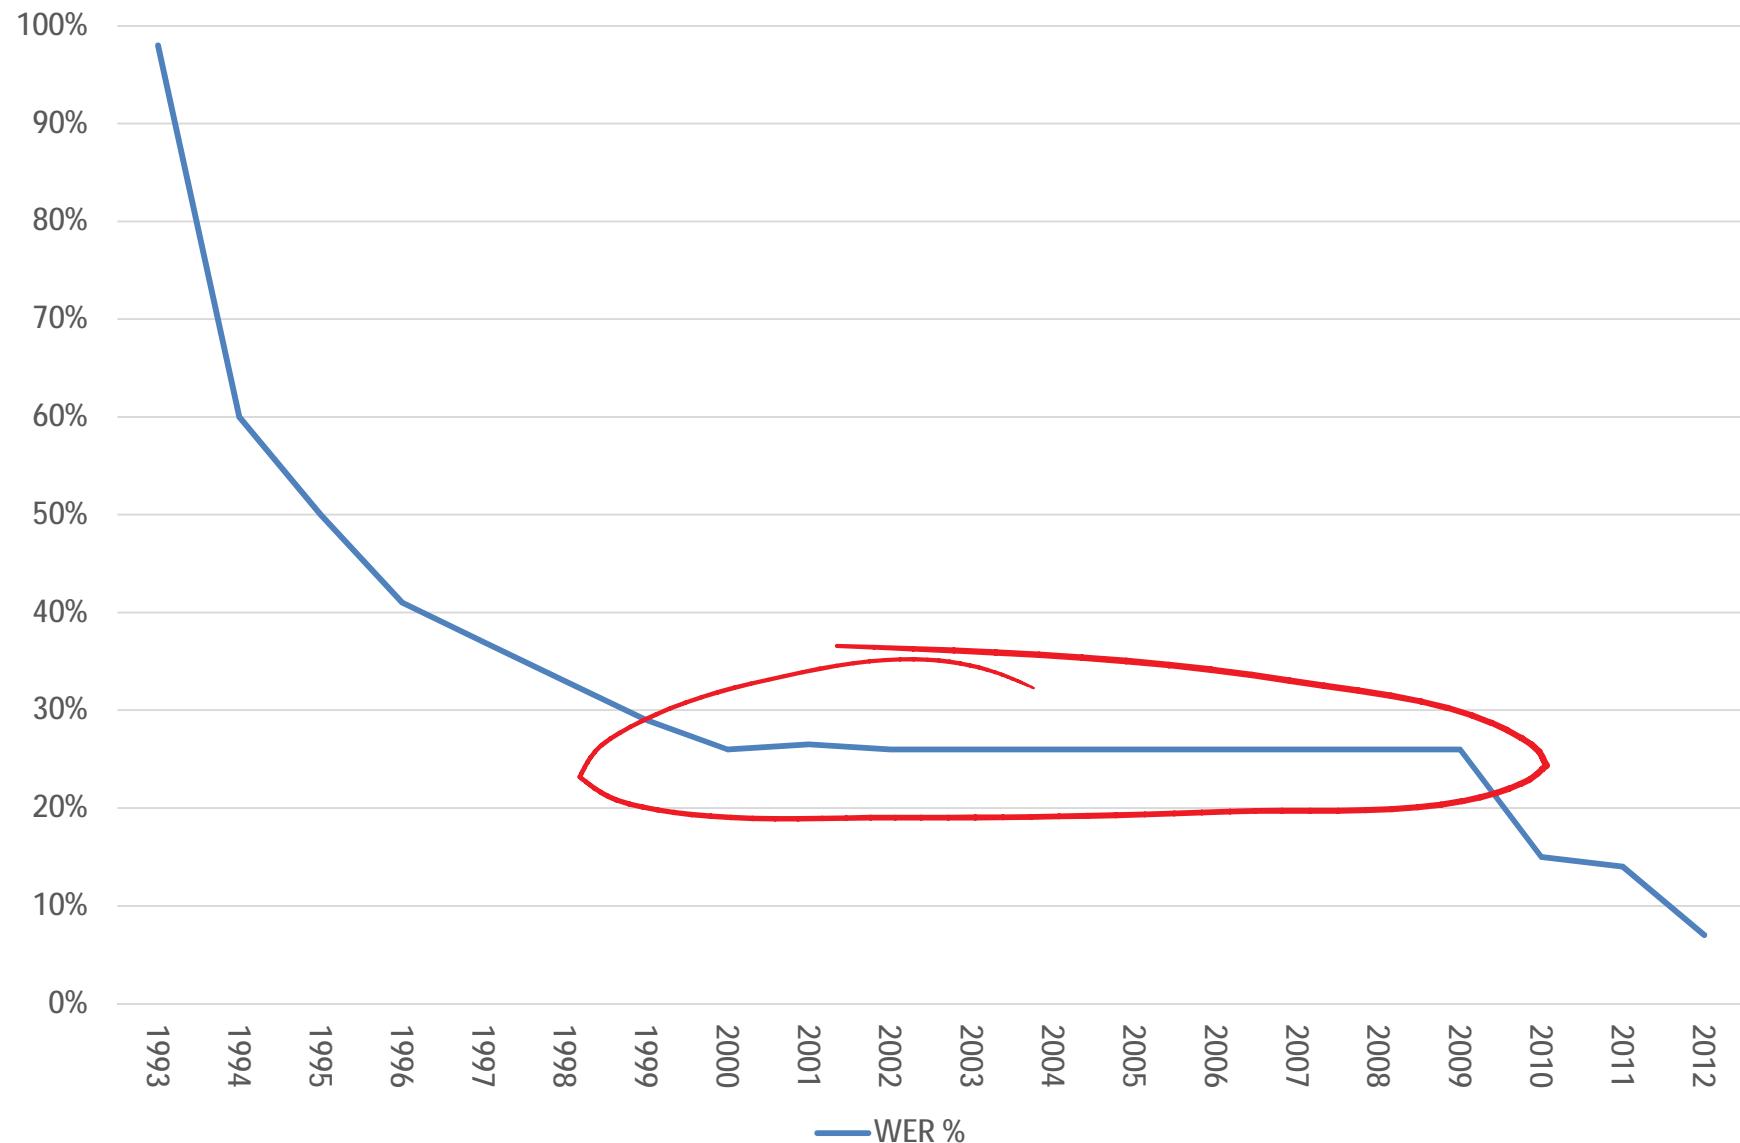

## IT Sectors With Large Economic Impact

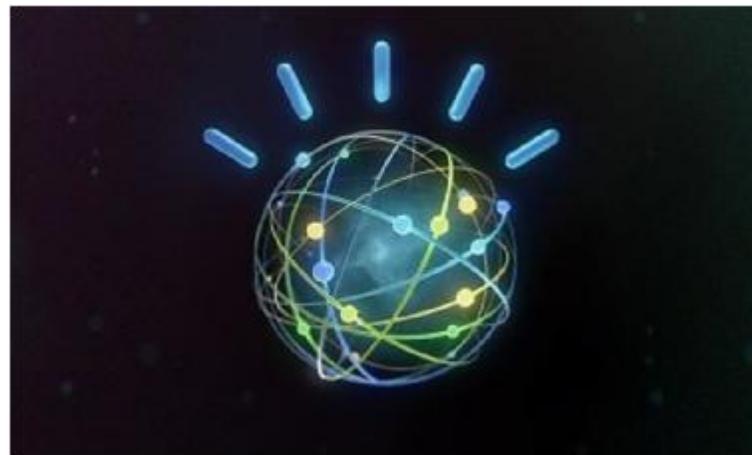

# Workshop agenda

8:30 – 9:00	<b>Robotics, Automation, and the Future of Transportation</b> Rodney Brooks, Rethink Robotics
9:00 – 10:30	<b>User Experience and Social Computing</b> Scott Hudson, Carnegie Mellon University Duncan Watts, Microsoft <i>Moderator: Beth Mynatt, Georgia Institute of Technology</i>
10:30	<b>Break</b>
11:00-11:30	<b>History of Wearables</b> Thad Starner, Georgia Institute of Technology
11:30	<b>Lunch</b>
12:30 – 1:30 PM	<b>Computer architecture, hardware, and systems</b> Margaret Martinosi, Princeton University Bob Colwell, Intel (retired) <i>Moderator: Barbara Liskov, Massachusetts Institute of Technology</i>
1:30 – 2:30	<b>Machine Learning and Artificial Intelligence</b> Jaime Carbonell, Carnegie Mellon University Eric Horvitz, Microsoft <i>Moderator: Peter Lee, Microsoft Research</i>
2:30 -2:45	<b>Break</b>
2:45 – 4:00	<b>Communications</b> Vint Cerf, Google David Culler, University of California, Berkeley Andrea Goldsmith, Stanford University <i>Moderator: Mark Dean, University of Tennessee, Knoxville</i>
4:00 – 4:30	<b>Cybersecurity/privacy/critical infrastructure</b> Stefan Savage, University of California, San Diego
4:30 – 5:30	<b>Value of Research Funding for Innovation</b> Deborah Estrin, Cornell Farnam Jahanian, Carnegie Mellon University <i>Moderator: Peter Lee, Microsoft Research</i>
5:30	Reception

We will hear from scholars and experts, some of whom “were there” – and others who will be there – on their reflections on the innovation ecosystem

Progress in automatic speech recognition

Research is a long game. Most modern IT companies have limited expenditures that look beyond one product cycle.

## The Internet

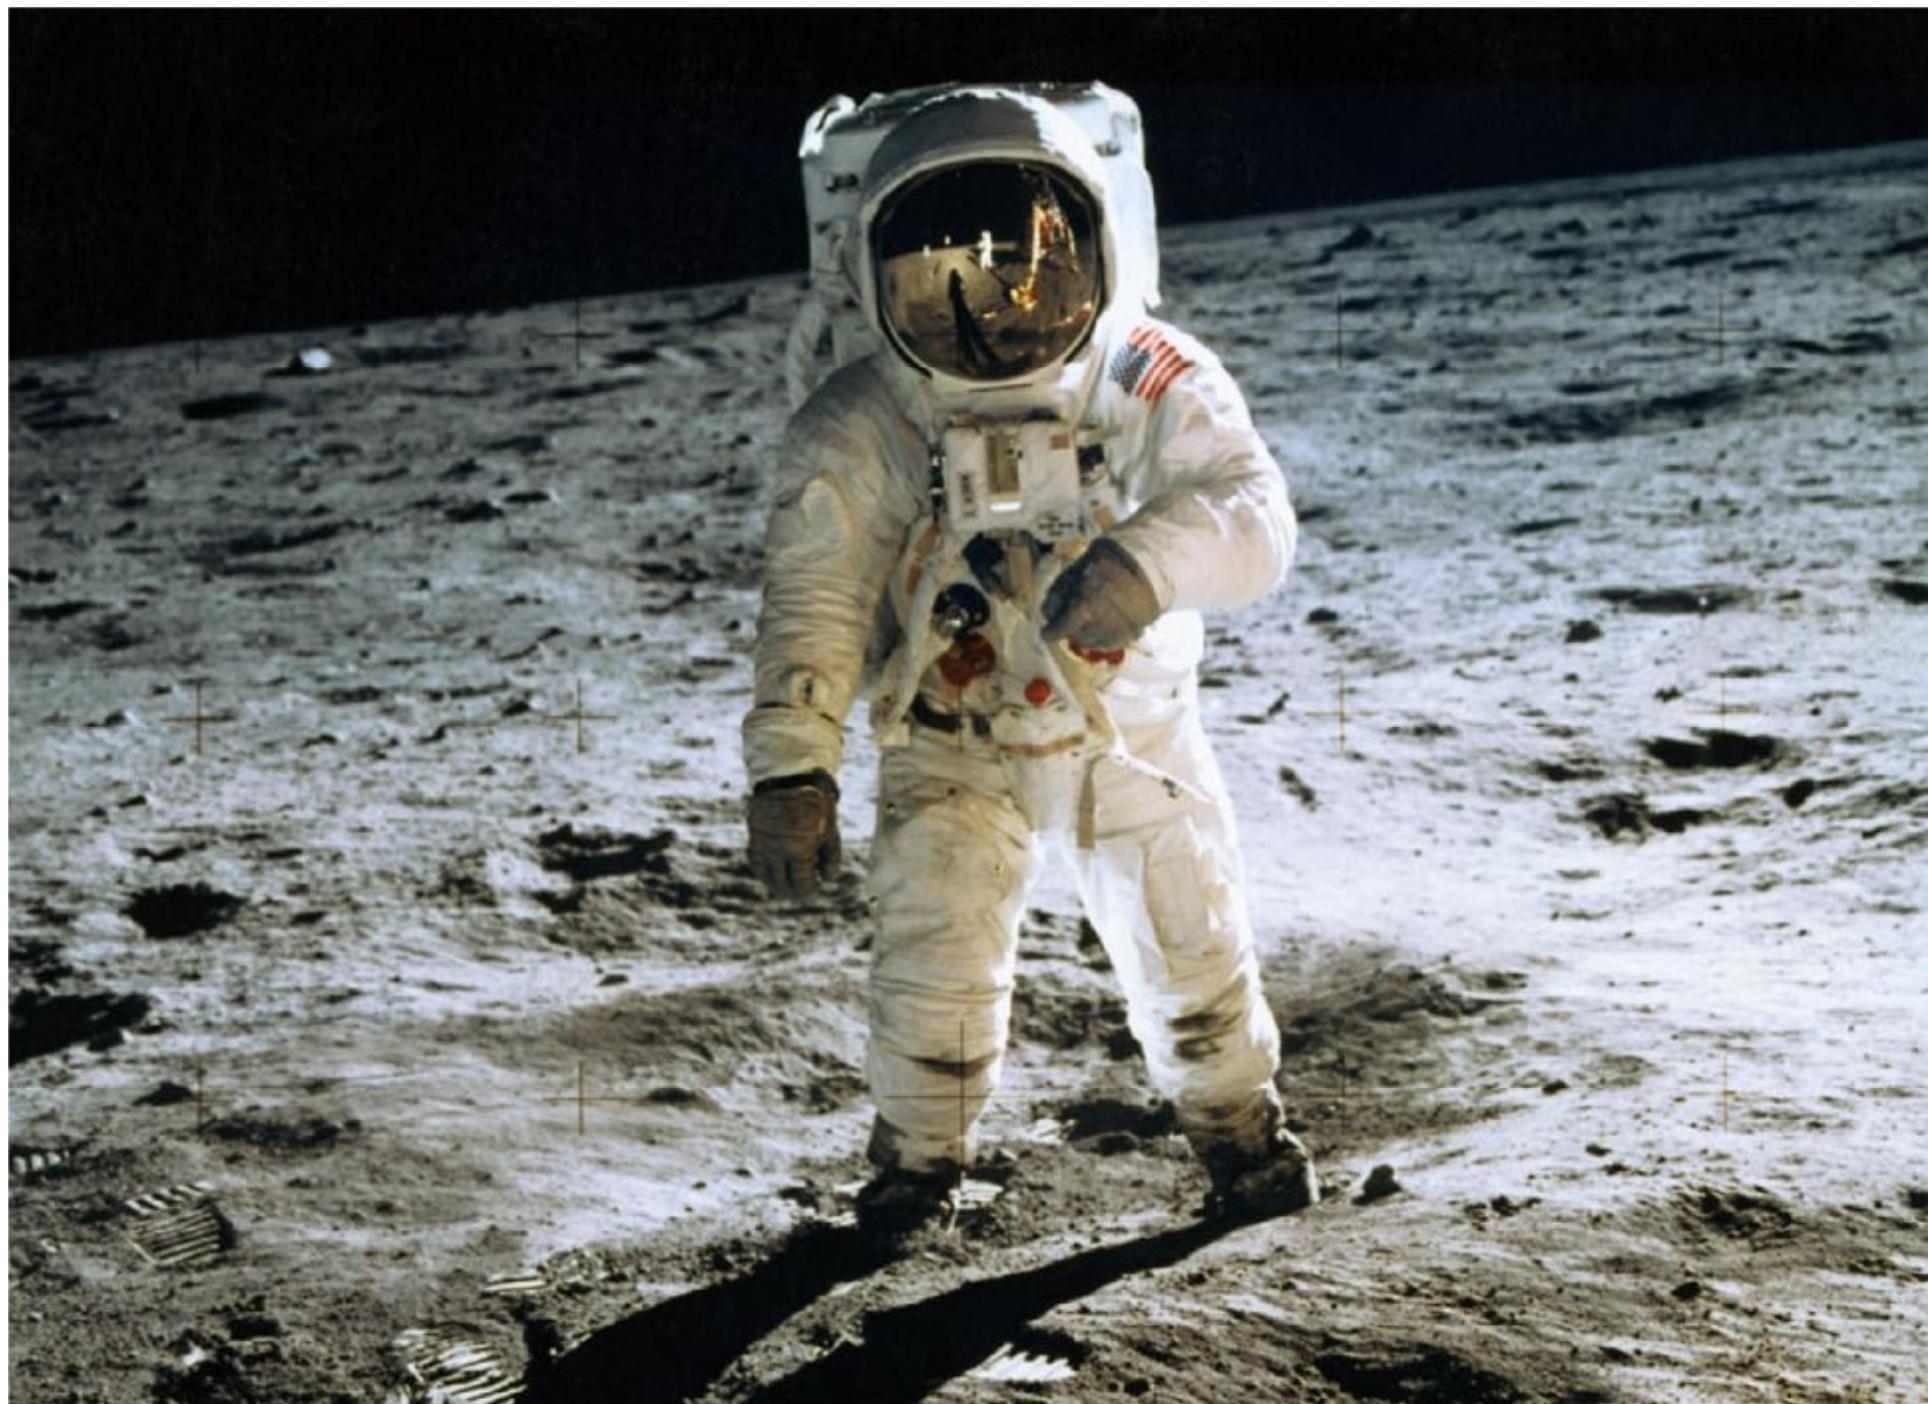

1966: First experiments in digital packet switching

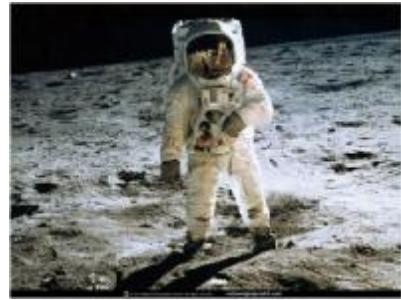

1968: ARPA issues RFQ for IMPs

AT&T says it will never work, and even if it does, no one will care

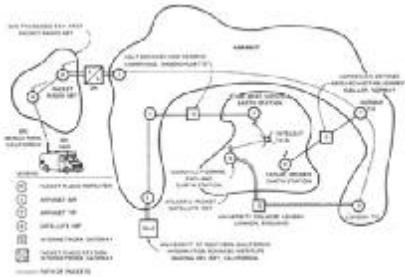

1969: Len Kleinrock's student (Charley Kline) attempts remote login from UCLA SDS Sigma 7 to SRI SDS 940

29 OCT 69	2100	LOADED	OP. PROGRAM CSK
		FOR BEN BARKER	
		BRN	
22:30		<u>talked to SRF</u> Host to Host	CSIC
		Left op. program CSIC	
		running after sending	
		a host dead message	
		to imp.	

Which had  
more impact?

Has your child been to the moon?

## Acknowledgments

NRC and NSF

Mark Dean, Tennessee

Ed Frank, Brilliant Cloud & Lime Parity

Yann LeCun, Facebook & NYU

Barbara Liskov, MIT

Beth Mynatt, Georgia Tech

Virginia Bacon Talati, NRC

Jonathan Eisenberg, NRC

Shenae Bradley, NRC
