

Board on Behavioral, Cognitive and Sensory Sciences
and the
Committee on Behavioral and Social Science Research to
Improve Intelligence Analysis for National Security

THE NATIONAL ACADEMIES

Public Workshop to

Explore Potential Lessons from Academia, Science and Research to Improve Intelligence Analysis

Friday, May 15, 2009 • 9:00 a.m. – 5:00 p.m.

Lecture Room of the
National Academy of Sciences
2100 C Street NW • Washington, DC

**Keynote Speaker: Lt.
Gen. Brent Scowcroft,
USAF (Ret.), former Na-
tional Security Adviser to
Presidents Gerald Ford
and George H.W. Bush**

This workshop will explore initiatives in various fields of academia, science and research which may be beneficial to the work of analysts in the U.S. Intelligence Community. The morning sessions will cover how analysis is taught in university and other settings. The afternoon sessions will expand the focus into potential lessons to be learned from Canadian intelligence counterparts,

Medical Decision Making Processes, and recent Intelligence Community initiatives. In addition, the Workshop's Keynote Speaker, Lt. Gen. Brent Scowcroft, USAF (Ret.), will provide perspectives on the value of intelligence analysis to national policy and decision makers.

Sponsored by the Office of the Director of National Intelligence
