Fact-checking President Trump's claims on the Paris climate change deal

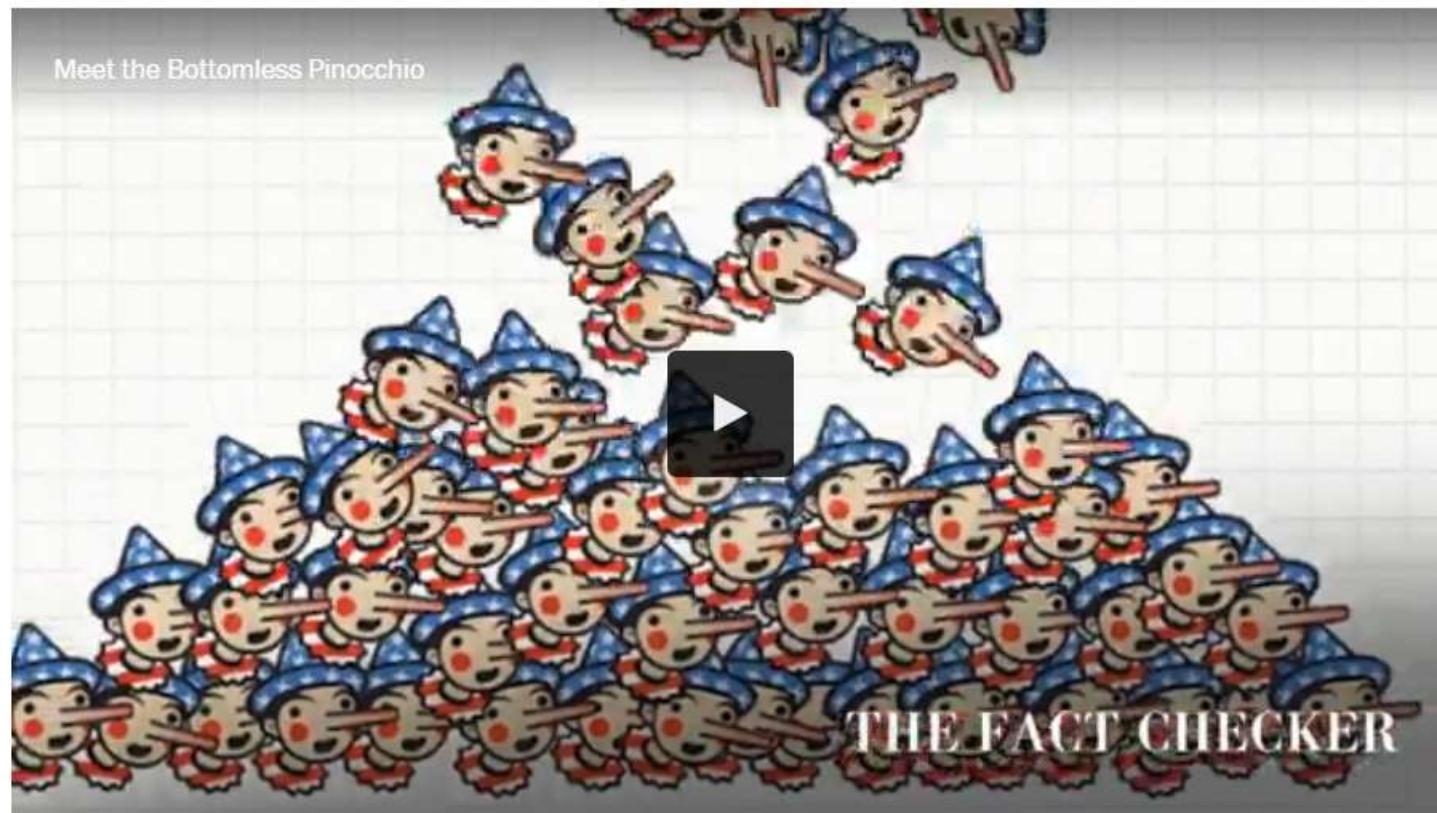

By Glenn Kessler and Michelle Ye Hee Lee June 1

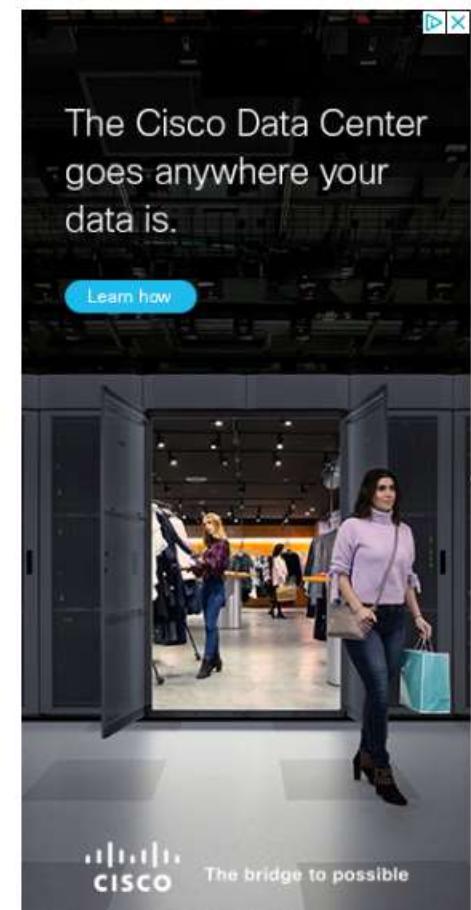

Fact Checkers Glenn Kessler and Michelle Lee examine several of President Trump's claims from his speech announcing the U.S. withdrawal from the Paris climate accord on Thursday. (Video: Meg Kelly/Photo: Jabin Botsford/The Washington Post)

In his speech announcing his decision to withdraw from the Paris Accord on climate change, President Trump frequently relied on dubious facts and unbalanced claims to make his case that the agreement would hurt the U.S. economy. Notably, he only looked at one side of the scale — claiming the agreement left the United States at a competitive disadvantage, harming U.S. industries. But he often ignored the benefits that

Meet the Bottomless Pinocchio, a new rating for a false claim repeated over and over again

President Trump's false and misleading claims that have been repeated more than 20 times led us to create a new Pinocchio rating. (Meg Kelly/The Washington Post)

Miracle cures or modern quackery? Stem cell clinics multiply, with heartbreaking results for some patients.

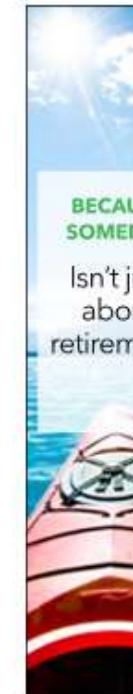

Doris Tyler, 77, went blind in 2016 after receiving unapproved stem cell injections in her eyes. Now she's suing. (Video: Monica Akhtar; Lisa Mills/Photo: Zack Wittman/The Washington Post)

By **Laurie McGinley** and **William Wan**
April 29

Doris Tyler lay on the examining table as the doctor stuck a long, thin tube into her belly. The doctor pulled back a plunger, and the syringe quickly filled with yellow blobs tinged with pink.

"Look at that beautiful fat coming out. Liquid gold!" one of the clinic's staff exclaimed in a video of the procedure provided to The Washington Post.

Hidden in that fat were stem cells with the amazing power to heal, the Stem Cell Center of Georgia had told Tyler. The clinic is one of hundreds that have popped up across the country, many offering treatments for conditions from Parkinson's disease to autism to multiple sclerosis.
