Amelia Karraker, PhD, Health Scientist Administrator, manages a portfolio in demography and social epidemiology of aging as well as social genomics at the National Institute on Aging (NIA). Before coming to NIA, she was an Assistant Professor in the Department of Human Development and Family Studies at Iowa State University. Prior to that, she was an NIA Postdoctoral Fellow at the Population Studies Center, University of Michigan. Her PhD in Sociology was awarded by the University of Wisconsin-Madison.

Kerry Anne McGeary is a senior program officer in the Research-Evaluation-Learning unit at the Robert Wood Johnson Foundation (RWJF). Prior to that role, she served as an active member of academia. An award-winning professor and researcher, she is a nationally-recognized economist whose extensive research has focused on economic policy, health economics, and health services. During her tenure in academia, she directed a state health and health policy research center, which was awarded both federally-funded and privately-funded grants and contracts. Her research has informed and fueled deliberations both in Congress and in state legislatures.

In reflecting on her work, McGeary says that “we must create a seismic shift in how we approach health, how it impacts our lives, and how health should guide the decisions we make. As a country, we need to expand our focus to address ways that we can promote health over the course of our lifetimes and for generations to come.”

She received her BA in Economics from Lehigh University and her MA and PhD in Economics from The Pennsylvania State University. She was a member of the National Bureau of Economic Research, and the holds an affiliated faculty position with the Institute for Health, Health Care Policy and Aging Research at Rutgers University.
