# International Collaboration among Public Owners toward

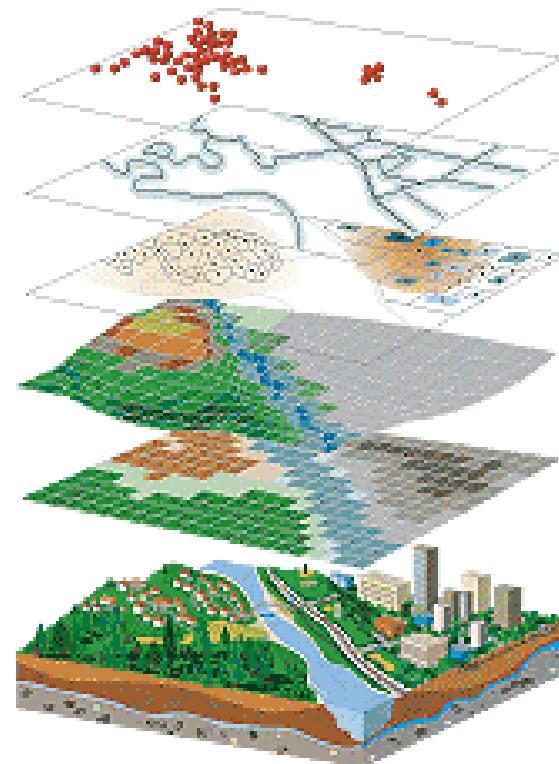

## Fostering open standards in the design & Construction Industry

- Joint statement in support of BIM, Smart Buildings, open standards and collaboration
- January 2008 - Public owners from United States, Finland, Norway, Denmark, and the Netherlands
- September 2011 - Expanded to 8 countries and included Smart Buildings technologies

# Geographic Information Systems (GIS)

- Compile data layers from external and internal sources
  - Some examples:
    - REXUS
    - HSIP Gold
    - NOAA
    - DOI
- Provides context for decision making

# GIS Users

Business Lines utilizing PBS CIO's GIS Technologies

- American Recovery and Reinvestment Act PMO
- Office of Emergency Response and Recovery
- PBS Office of Design and Construction
- PBS Office of Portfolio Management

In addition, we are working on the following projects

- White House National Wireless Initiative
- GSA Sustainability Map

# Surge in Construction Investment - ARRA

## GIS Example

---

### About

- PBS PMO requested map, specified specs and provided data
- [ARRA Map](#)

### Capabilities

- Displays:
  - Funding
  - Photos
  - Individual project descriptions
  - LEED

# Urban Development's FlexViewer

## GIS Example

### About

- A query tool developed for Urban Development
- [FlexViewer](#)

### Capabilities

- Displays:
  - Walk score
  - Client
  - Transportation buffers
  - Owned and leased buildings

# Response to Threats and Current Events

## GIS Example

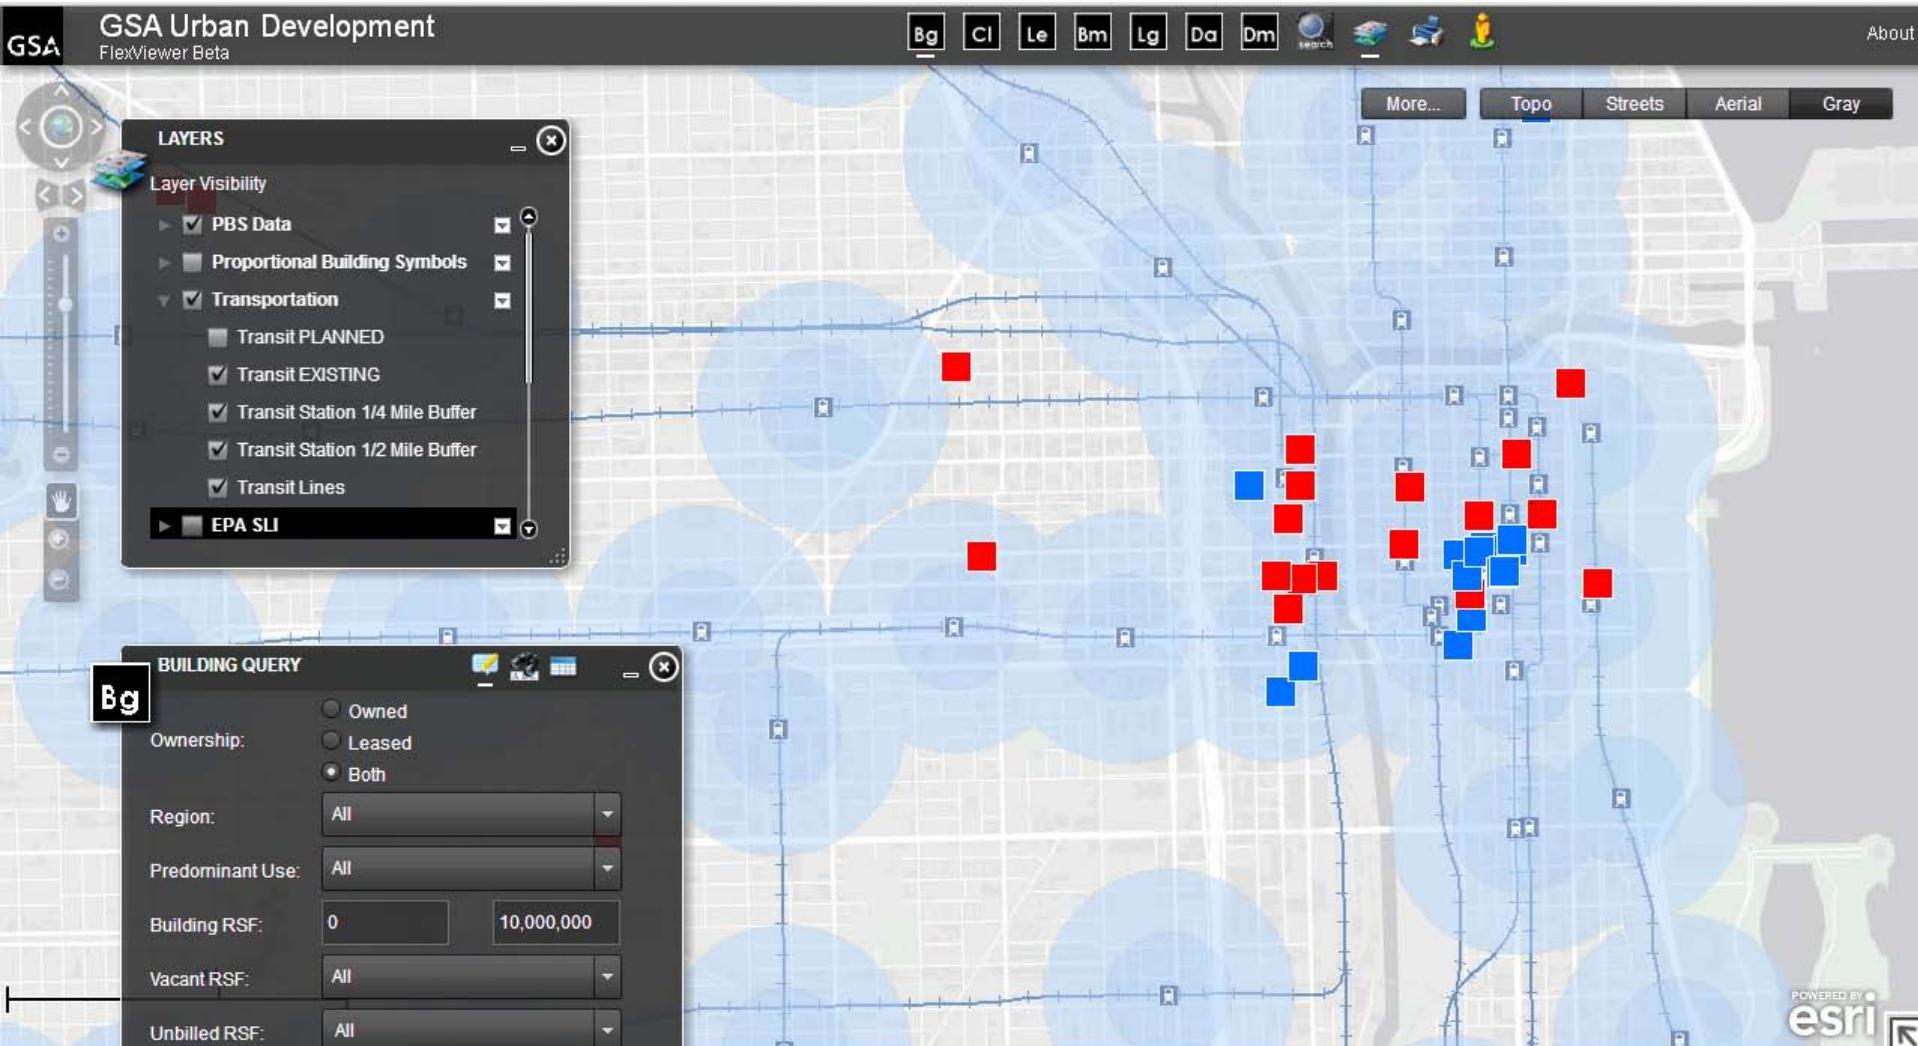

### About

- OERR requested
- Built in ArcGIS Desktop Explorer

### Capabilities

- Displayed
  - Buildings
  - Occupy Locations

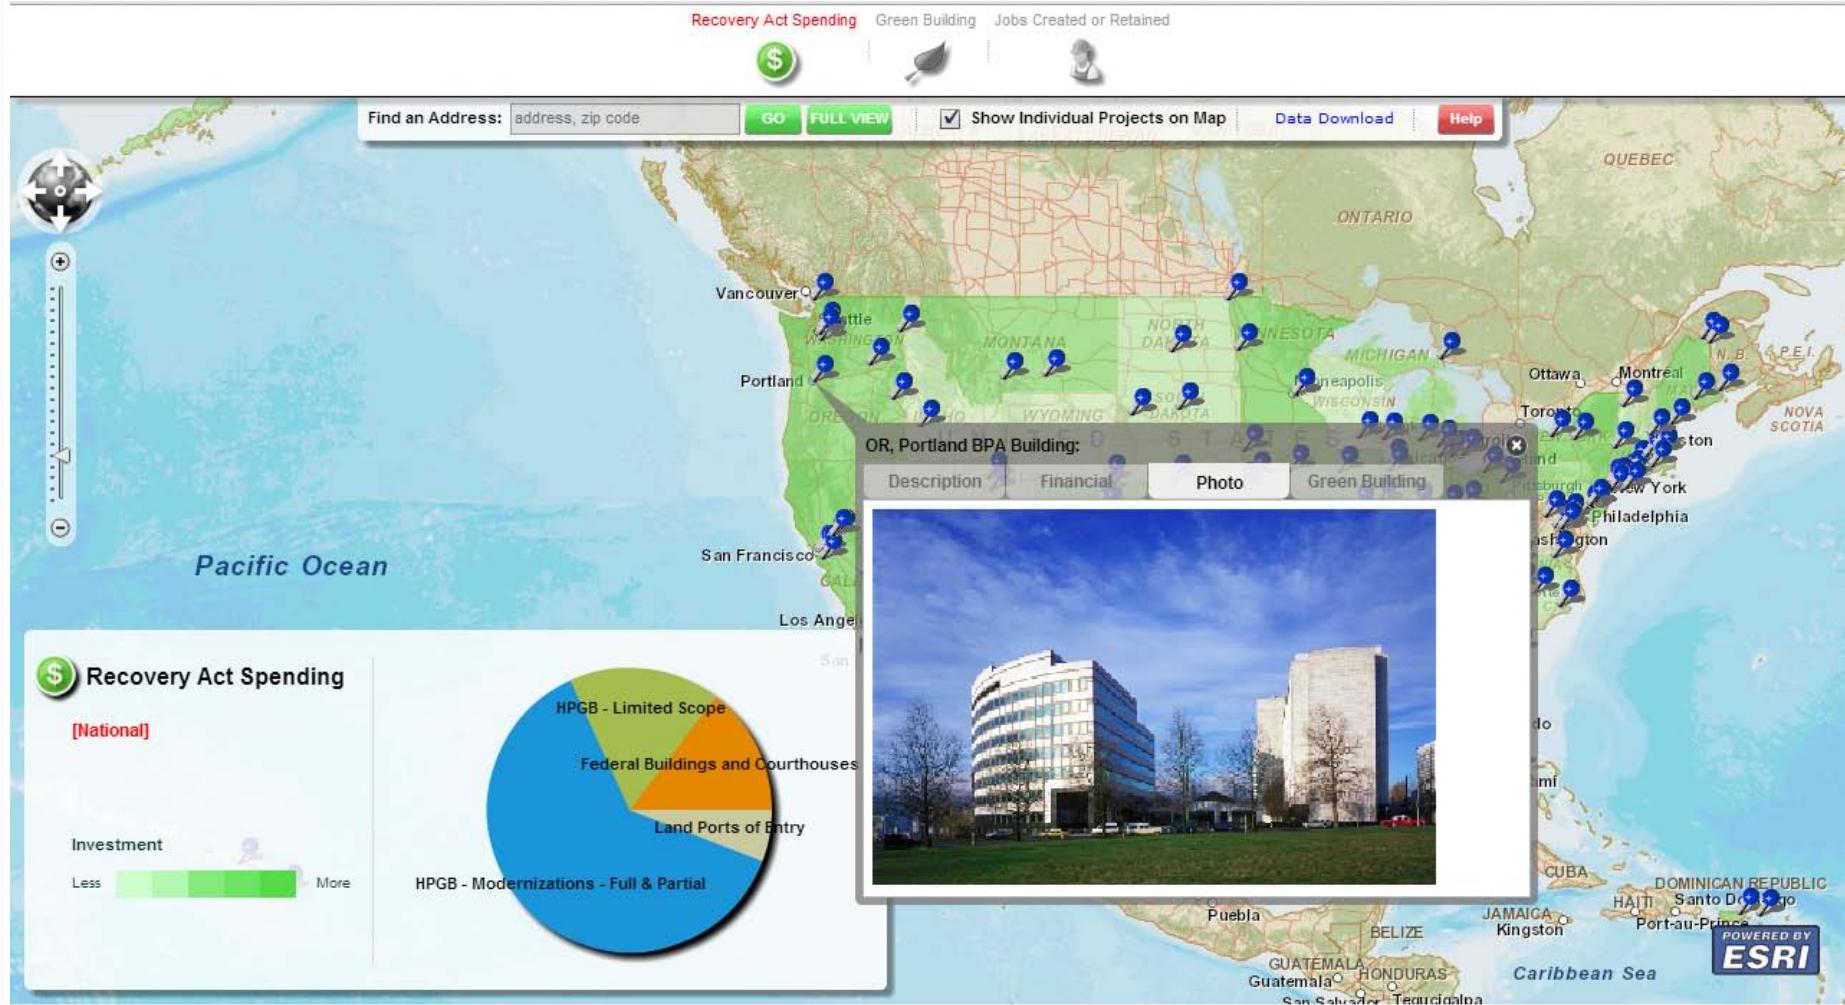

# GSA PBS Urban Development Map

# ARRA Map

Recovery Act Spending   Green Building   Jobs Created or Retained

Find an Address: address, zip code   GO   FULL VIEW    Show Individual Projects on Map   Data Download   Help

ARRA Map showing Recovery Act Spending across North America. Projects are marked with blue pins. A callout box for the 'OR, Portland BPA Building' project is displayed, showing a photo of the building and tabs for Description, Financial, Photo, and Green Building. The map also shows the Pacific Ocean and the Caribbean Sea.

# Connecting BIM & GIS

The 3D-laser scanning:  
From Building Features to  
3D model

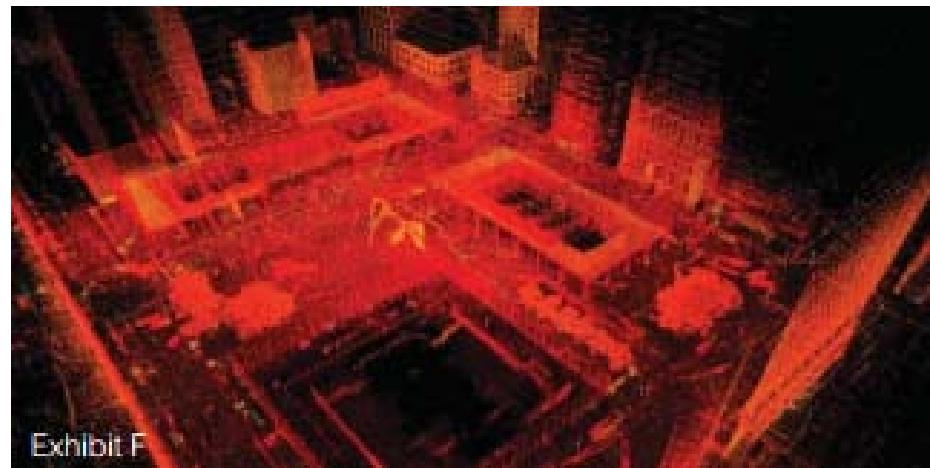

# Chicago Federal Center & Plaza

Building data can be integrated with GIS for macro- and micro-level analysis

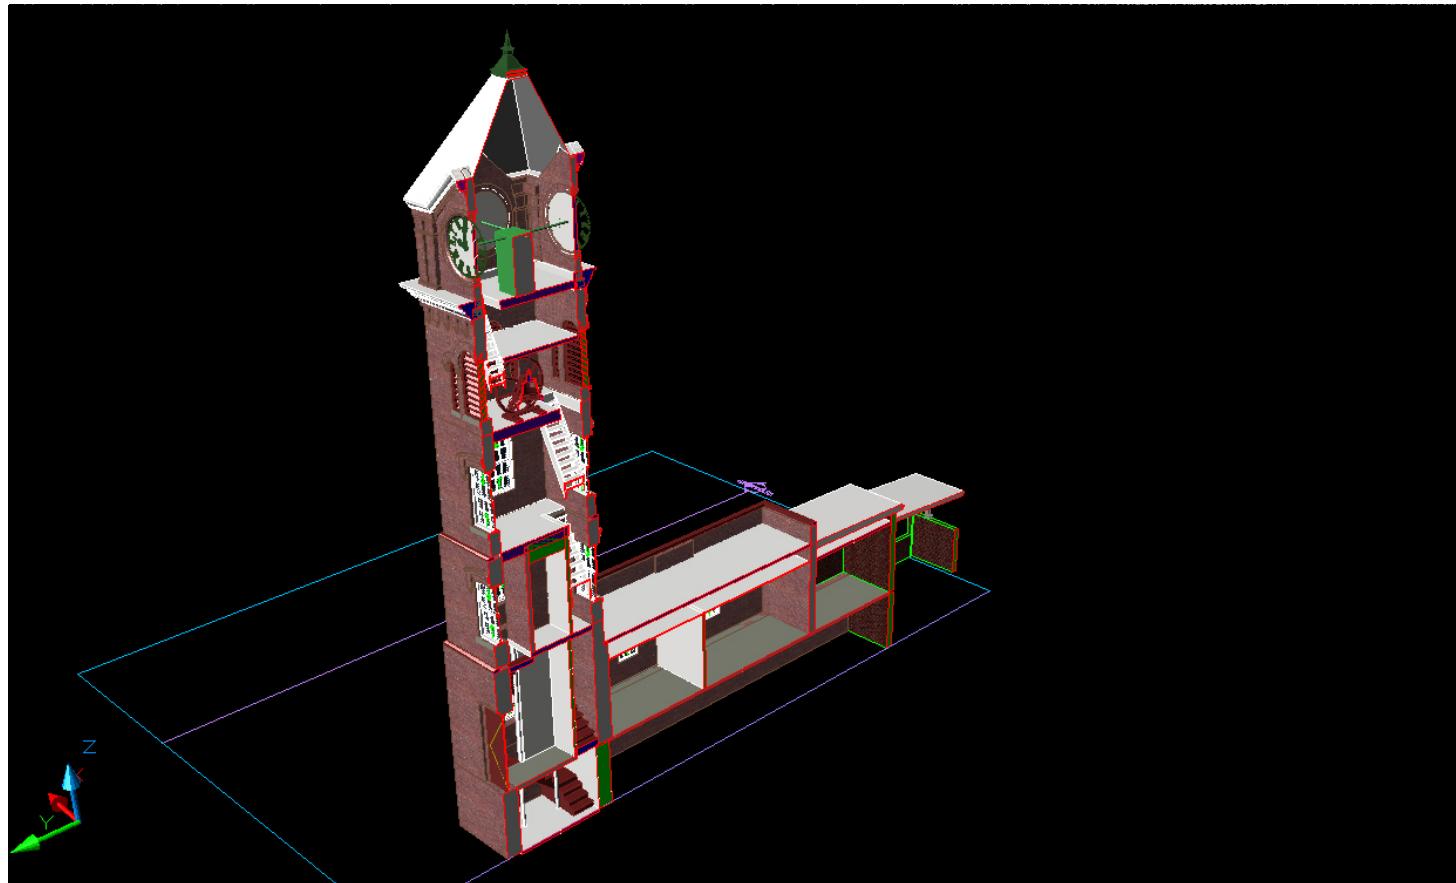

Laser Scanning provides accurate as-built conditions of the campus to create digital models

# St. Elizabeth's Campus (NCR)

# St. Elizabeth Campus

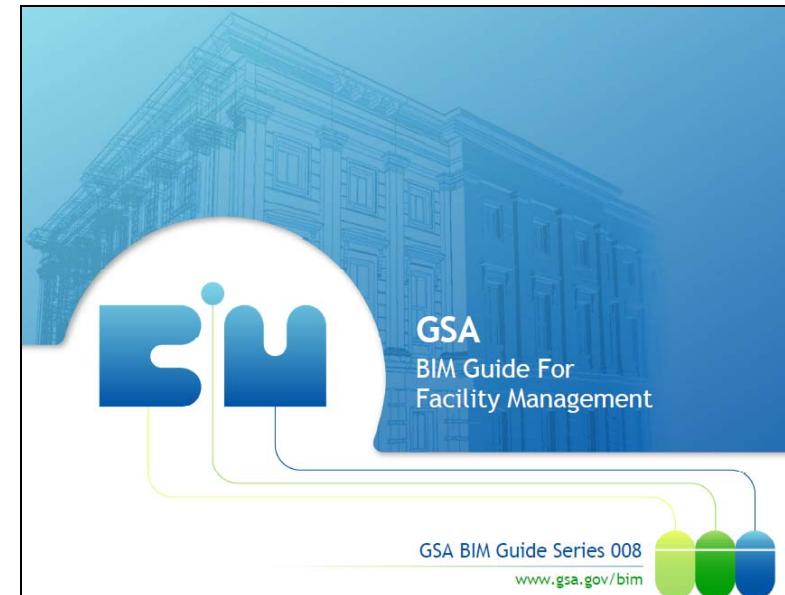

# GSA BIM Guide Series

- Provides best practices and implementation guidance
- Industry-reviewed and used widely by practitioners
- Adopted by other owners (within US and internationally)
- Publicly available on [gsa.gov/bim](http://gsa.gov/bim)

## Current BIM Guide Series

- 01— Overview
- 02— Spatial Program Validation
- 03— 3D Imaging
- 04— 4D Phasing
- 05— Energy Performance and Operation
- 06— Circulation and Security Validation
- 07— Building Elements
- 08— Facility Management

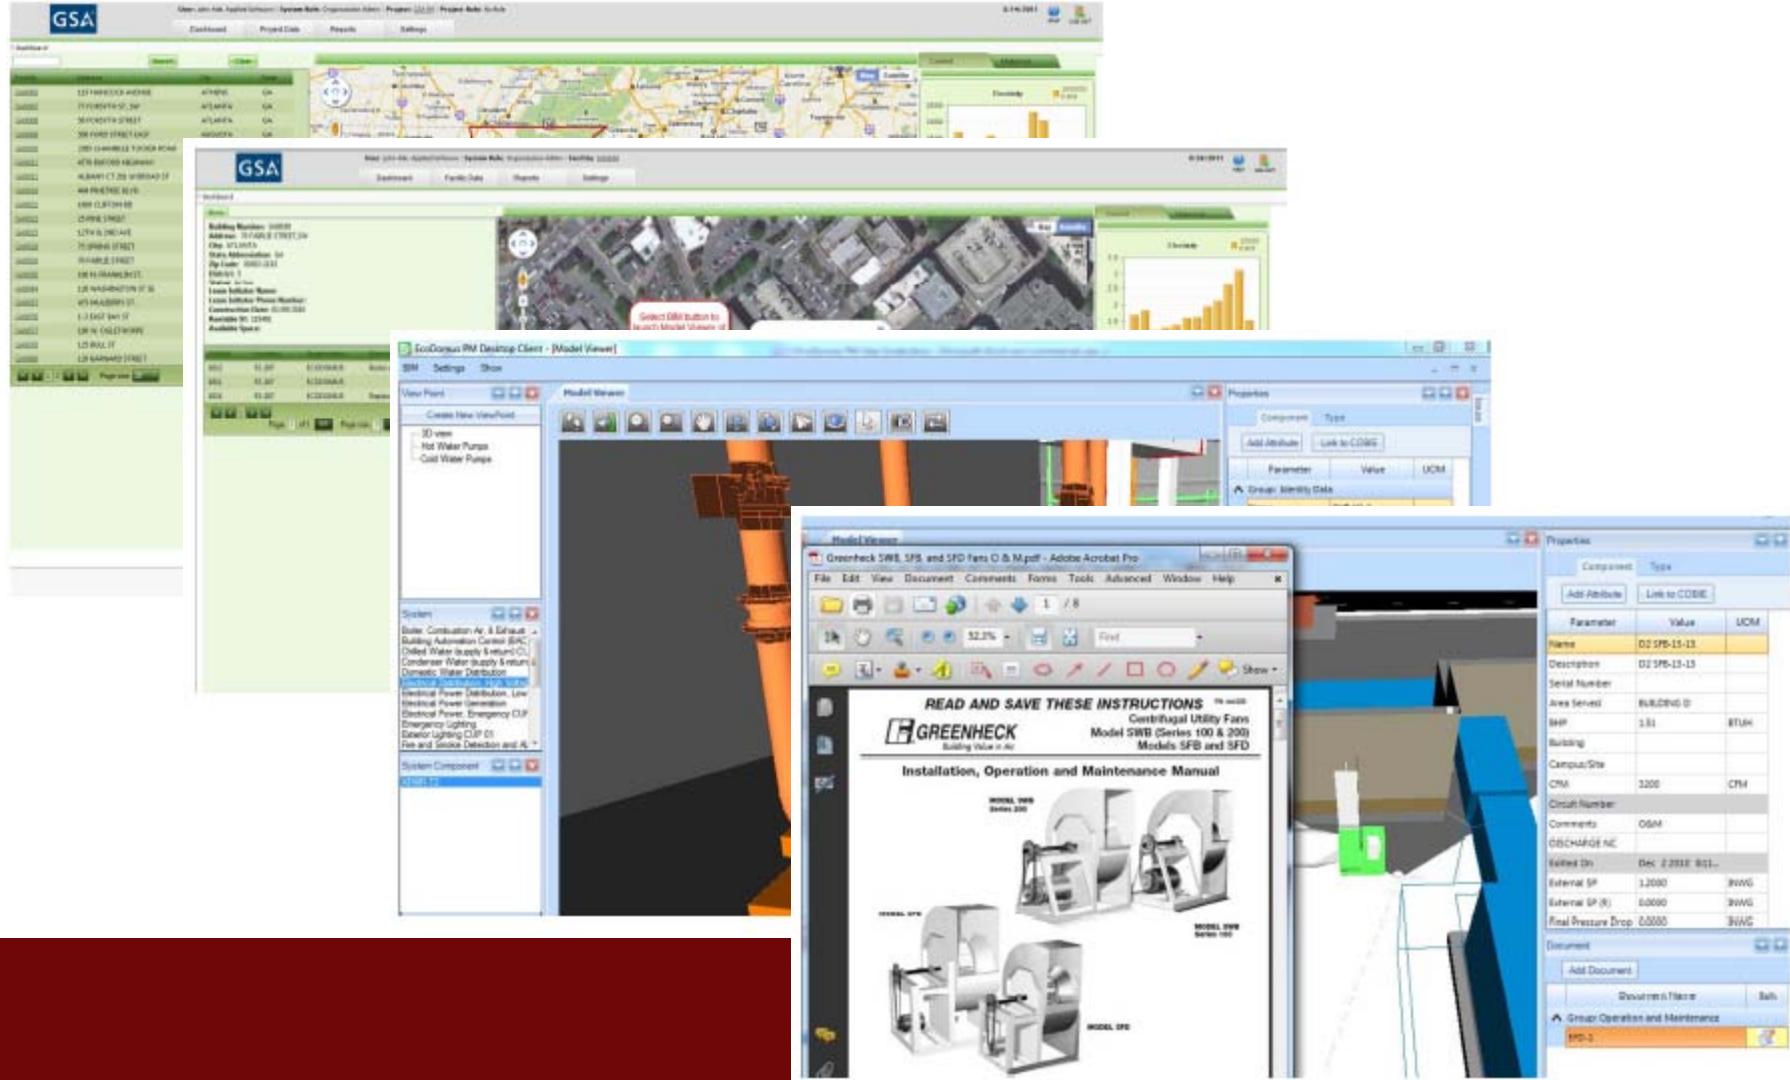

# GSA BIM Guide Series 08: BIM and Facility Management

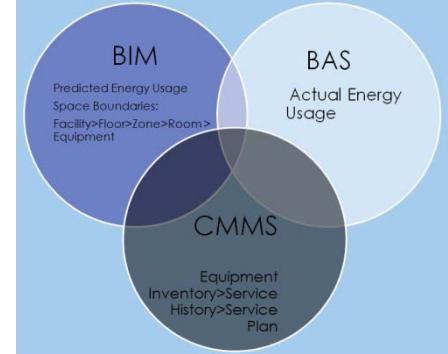

Available at [www.gsa.gov/bim](http://www.gsa.gov/bim)

- Section 1: BIM and Facility Management** – Overall vision and objectives for using BIM during facility management.
- Section 2: Implementation Guidance**
  - Implementation guidance to GSA associates and consultants.
- Section 3: Technology Assessment**
  - Technology requirements for creating and using BIMs for facility management.
- Section 4: Modeling Requirements** – BIM object and attribute requirements for use during facility management.
- Section 5: Pilot Projects** – Description of GSA Pilot Projects for BIM and FM

# BIM-FM across GSA (Region 4 Prototype)

# BIM / BAS / CMMS Integration

The interface shows a 3D BIM model of a building's HVAC system. A specific component, 'VAV Box D01', is highlighted in blue. A callout box displays its current status: 'Damper Position' at 41.50, 'Discharge Air Temp...' at 105.05, 'Room Set Point' at 70.00, 'Room Temperature' at 69.67, 'Supply Air Flow' at 190.70, and 'Supply Air Flow Set...' at 190.70. The left sidebar contains a 'Viewpoints' menu with items like 'System', 'System Asset', 'Search Asset', 'Impact', 'Search Space', 'Room Data Sheet', 'Work Orders', and 'BAS Information'. The right sidebar is a 'Properties' panel for the selected VAV Box D01, showing a table of identity data and constraints.

# 3D-4D Building Information Modeling

In 2003 the General Services Administration (GSA), through its Public Buildings Service (PBS) Office of Chief Architect (OCA), established the National 3D-4D-BIM Program. OCA has led over 30 projects in its capital program, and is assessing and supporting three dimensional (3D), four-dimensional (4D), and Building Information Modeling (BIM) applications in over 35 ongoing projects across the nation. The power of visualization, coordination, simulation, and optimization from 3D, 4D, and BIM computer technologies allow GSA to more effectively meet customer, design, construction, and program requirements. GSA is committed to a strategic and incremental adoption of 3D, 4D, and BIM technologies.

There is a progression from 2D to 3D, 4D, and BIM. While 3D models make valuable contributions to communications, not all 3D models qualify as BIM models since a 3D geometric representation is only part of the BIM concept.

Critical to successful integration of computer models into project coordination, simulation, and optimization is the inclusion of information—the “I” in BIM—to generate feedback. As a shared knowledge resource, BIM can serve as a reliable basis for decision making and reduce the need for re-gathering or re-formatting information. GSA is currently exploring the use of BIM technology throughout a project’s lifecycle in the following areas: spatial program validation, 4D phasing, laser scanning, energy and sustainability, circulation and security validation, and building elements.
