

Second Meeting of the Committee on *Daubert* Standards
March 27, 2005
Agenda

1:30 *Daubert Revisited – Areas Needing Further Study*

Committee Co-Chairs:

Margaret Berger, Suzanne J. and Norman Miles Professor of Law, Brooklyn Law School
Douglas Weed, Chief, Office of Preventive Oncology, National Cancer Institute, NIH

1. Evidence Synthesis in Science and Law – A consideration of the different approaches used by scientists, lawyers, and judges in the selection, summarization, and interpretation of scientific evidence.
2. Involvement of Scientists in the Legal Process – A consideration of how the *Daubert* decision has changed the involvement, role, and responsibilities of scientists in the courtroom, and opportunities and challenges for more multi-disciplinary education and research in science and law.
3. Availability of Information-A consideration of how courts and the public respond when scientific information is not forthcoming, whether because pertinent studies were never undertaken, or were conducted but never disclosed, or were sealed in settlement/secrecy agreements.

5:30 *Adjourn*
