The University Industry Demonstration Partnership (UIDP) is a unique model for bolstering the research, career preparation, and job placement needs of graduate students in the public sector and non-profit organizations.

In 2008, the UIDP (University Industry Demonstration Partnership) began in Austin (at a trip to the University of Texas at Austin) and continued that same fall to the West Coast when the UIDP (University Industry Demonstration Partnership) took place in San Francisco, California. Since then, the UIDP (University Industry Demonstration Partnership) has continued to grow and expand with new members and new universities.

The UIDP is a unique model for bolstering the research, career preparation, and job placement needs of graduate students in the public sector and non-profit organizations.
