

## The Case for International Sharing of Scientific Data: A Focus on Developing Countries

*An International Symposium*

### Željko Ivezić

Željko Ivezić is a professor in the Astronomy Department at the University of Washington. He holds a PhD in physics from the University of Kentucky, and B.Sc. degrees in physics and mechanical engineering from the University of Zagreb, Croatia. His research interests are in detection, analysis, and interpretation of electromagnetic radiation from astronomical objects, with emphasis on massive data sets and statistical analysis. He is one of the builders of the Sloan Digital Sky Survey ([www.sdss.org](http://www.sdss.org)), and serves as the Project Scientist for the Large Synoptic Survey Telescope ([www.lsst.org](http://www.lsst.org)).
