Additional USDA/ARS Research Tools and Resources

USDA ARS Office of International Research Programs (OIRP)
The Office of International Research Programs (OIRP) is the main contact for international activities in the Agricultural Research Service (ARS). Working with the ARS Office of National Programs, our OIRP Regional Specialists work to engage strategic international partnerships that can enhance the productivity, effectiveness, and impact of ARS National Programs, as well as further the goals of the United States government.

USDA Ag Data Commons
Data products from across USDA research projects

USDA ARS Databases and Datasets
Agricultural Research Service programs generate many publicly accessible data products that are catalogued in the Ag Data Commons. These databases, datasets, and data collections may be maintained by ARS or by ARS in cooperation with other organizations.
