Therefore, observers who draw conclusions about the committee’s work based on discussions during this meeting will be doing so prematurely. Furthermore, individual committee members often engage in discussion and questioning for the specific purpose of probing an issue and sharpening an argument. The comments of any given committee member may not necessarily reflect the position he or she may actually hold on the subject under

discussion, to say nothing of that person's future position as it may evolve in the course of the committee's activities.
